SEASONAL RESEARCH TECHNICIAN – needed for telemetry study of Hawaiian Duck survival, movement, nesting and molting ecology. The position located at Hanalei NWR on the island of Kauai. Hawaiian Ducks are listed under the federal endangered species act, yet almost nothing is known about population demographics, habitat use, or movements. We seek a motivated, energetic, self-guided individual with experience using null-peak telemetry systems to help collect data on a sample of male and female Hawaiian Ducks implanted with VHF transmitters. Preference will be given to applicants with experience using telemetry to study waterfowl nesting ecology. Compensation includes a round trip plane ticket, housing, vehicle, and monthly stipend for food. Start date – as soon as a suitable applicant is found. End date - October 31. If interested please email a cover letter and resume that includes the names and contact information for three references to Chris Malachowski (chris.malachowski@oregonstate.edu). In your cover letter please list your earliest possible starting date.
