Photography has long been considered one of the creative arts. There is little doubt that a photographer uses special artistic skills to create a photo. The professional publication of a photo often serves as a validation of the level of the photographer’s creative ability. Dr. Byron Augustin is one of the most prolific creative photographers in college and university teaching. A list of the number of photos that Dr. Augustin has published is too extensive to include in a vita. Therefore, a summary of his lengthy portfolio of creativity will be listed.

- Publication of 1,086 copyright photos in books, slide sets, magazines, exhibits, professional reports, academic journal articles, posters, video tapes, and newspapers.
- Publication by fifty-five individual publishers located on four different continents.
- Photos published in books representing the academic disciplines of geography, history, world cultures, music, modern languages, religion, environmental studies, climatology, social science, biology, mathematics, earth science, literature, anthropology, archeology, women’s studies, general science, reading, agriculture, oceanography, and physics.
- Photos permanently displayed at the Texas State Aquarium, Big Thicket National Preserve, and the Arab-American Cultural and Community Center of Houston, Texas.

- The 20-photo exhibit, "Images of Arabia," shown at the Field Museum of History in Chicago and the National Geographic Society in Washington, DC.
- Photos published from twenty-one independent nations, eight U.S. states and the District of Columbia.
- Twenty-seven photos published by the National Geographic Society, one of the world's premiere publishers of quality photography.
- A significant contributor of photos to both Texas Highways Magazine and Texas Parks and Wildlife Magazine, including the cover photo for an issue of Texas Parks and Wildlife Magazine.
