External Funding for Graduate Students in Mathematics Education – Special Longer Session!

Dr. Andrea K. Hilkovitz
The Graduate College, Texas State University

1:00 pm in Derrick Hall 238
14 October 2016

Abstract: This workshop will provide an overview of funding sources for graduate students. You will learn the difference between internal and external funding, find out what resources are available to you at Texas State, and get tips for finding and applying for scholarships, fellowships, and grants to support your studies and research. Information about opportunities specific to STEM, mathematics, and mathematics education will also be provided.

Dr. Andrea Hilkovitz received her BA from Rice University and her MA and PhD from the University of Texas at Austin. Before coming to Texas State, she was a tenure-track faculty member at Mount Mary University in Milwaukee, Wisconsin, where she taught professional, technical, and grant writing to undergraduate and graduate students in the English Department. Dr. Hilkovitz has a strong track record of securing external funding, both as a graduate student and as a faculty member, and she currently uses her grant-writing expertise to help Texas State graduate students find and apply for external funding in her role as The Graduate College’s external fellowships officer.
