

INSTRUCTIONS TO DOWNLOAD MICROSOFT® SOFTWARE FROM MSDN ACADEMIC ALLIANCE SOFTWARE CENTER

Disclaimer:

Only those CIS majors, who are enrolled in CIS courses that use the Microsoft products provided by MSDNAA, are eligible to download.

Before you download:

Please ensure that the following prerequisites are met before you begin downloading the software. This is absolutely critical if you would like to have a hassle free download.

- Please note that the process described below, applies only to those Microsoft products, which download as an **ISO image**.
- Make sure you have:
 1. A constant high-speed (broadband/Cable/DSL) internet connection. Dial-up modem connection will not work due to excessively large download files.
 2. At least 2GB of free space on the hard disk.
 3. CD/DVD burner.
 4. CD/DVD burning software like Nero/Sonic/Ulead/Easy Creator/Roxio etc.
- You are allowed only one install per software per academic year. Additional installs will not be authenticated or permitted under any circumstances. It is therefore crucial that you follow these instructions **to the letter**.
- It is highly recommended that you download and create your CDs/DVDs in **McCoy 332/334/336**. All systems in these labs have

high-speed internet, CD/DVD burner and the required CD/DVD burning software.

Download Process:

- 1) At the beginning of each semester, you will receive an email from e-Academy about your activation or re-activation. This will include your login ID and password. Please note that your username is typically the university assigned email address.
- 2) Please login to the e-Academy website at http://msdn05.e-academy.com/swt_cis using the login ID and password sent in the email.

The screenshot shows the MSDN Academic Alliance Software Center website. The header includes the Texas State logo, the MSDN Academic Alliance Software Center branding, and the Microsoft logo. Below the header, there are navigation tabs for 'Software' and 'Support'. A 'Log In' button is circled in red, with a red arrow pointing to it and the text 'Step 1: LOGIN' below. The main content area includes a welcome message, a 'Software' section with a description of the MSDNAA program, and a 'Help' section. On the right side, there is a grid of software product boxes, including Windows, Visual Studio .NET, and SQL Server. The footer contains links for 'Software', 'Privacy Policy', and 'Support', and is powered by e-academy.

- 3) Once you are successfully logged in, click on the button labeled **“software”**. This will take you to a page displaying a list of downloadable products made available by Microsoft as part of the academic alliance program.

[Get Your Personal CDs Here!](#)

Microsoft Office Access 2003
Windows Vista (DVD)
Project 2003 Professional
Virtual PC 2004
SQL Server 2005 Dev. Ed.
Visual Studio 2005 CD Sale
Win XP Pro CD Sale
Visual Studio 2005 Professional
Win XP Pro with SP2
Windows Server 2003 Std. Ed.
Microsoft .NET Framework 1.1 SDK
Microsoft Office Visio Professional 2003

These can be ordered on CDs from Microsoft for the cost of media and S/W.

- 4) Please follow the following steps for each title that you wish to download (see the disclaimer):
- Select your software from the list or click on the images to view the details of the product. Please note that unless otherwise noted, all software downloads require at least one blank CD. Also note that titles in DVD format are not available in CD format.
 - Select the download option and then click on the **“Add to Cart”** button.
 - If displayed, accept the license agreement. You may have to scroll down to view the **“I AGREE”** button.
 - The product will be added to your cart. You may continue shopping if you wish to add more software products or you may check out using the appropriate buttons displayed.

[Dial-up Users. Click here for Additional Information](#)

[Download](#) Download From: auster.cs.txstate.edu

Notes:

If your download takes longer than 20 minutes, you may be prompted to log back in to continue using the website.

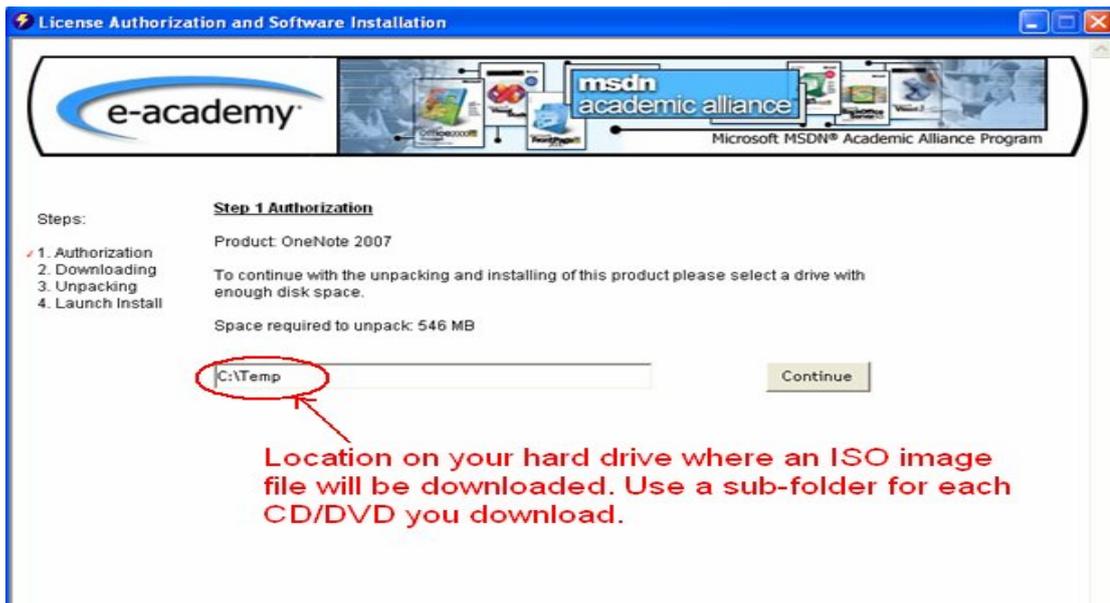

After you have completed the download, you may close your browser to complete your session.

If you would like to obtain other products, simply return to the storefront by selecting the appropriate option from the header bar above.

- 8) Once you click on “**download**”, an application file (boot-strap program) will be downloaded. Save it on to your desktop. The file will have an icon similar to the one shown below.

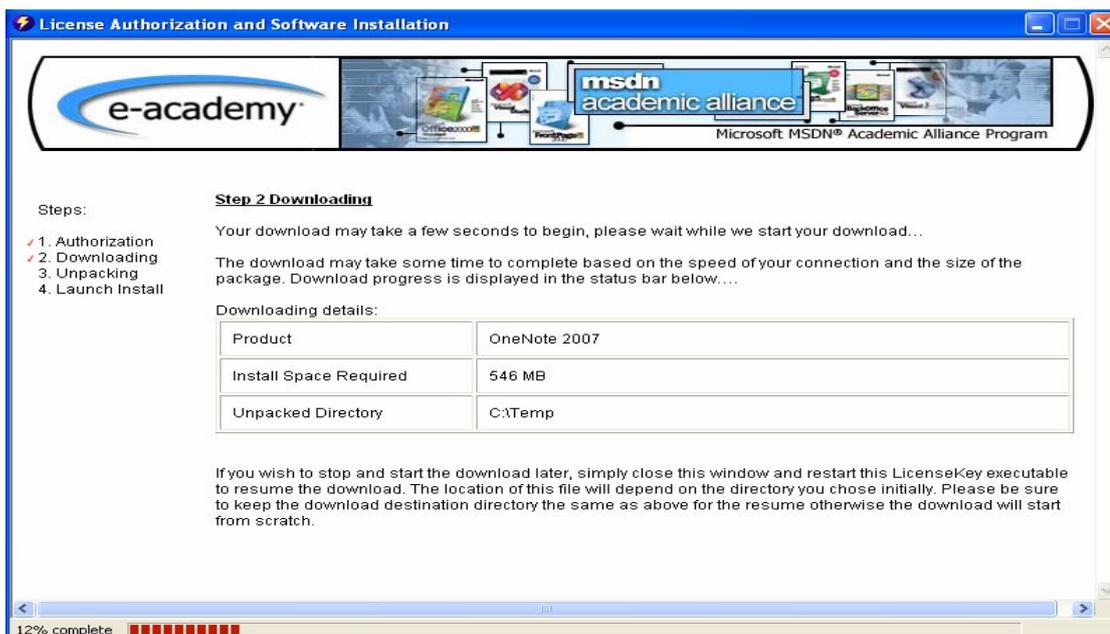

- 9) Double click on this icon to start the actual download process. **Please note that this download is allowed only once.** Therefore, do not delete the application file until you have downloaded the entire software from the server and burned your CD/DVD.
- 10) Do not disconnect your internet connection until you have downloaded the software. The download and install procedure is a four-step process as enumerated below: Authorize, Download, Unpack and Install.
- 11) A webpage will popup to request a location on your local drive - to which the software has to be downloaded. For multiple CDs, please designate a separate sub-folder for each disk. Specify the path to that sub folder in the “location” textbox and click on “**continue.**”

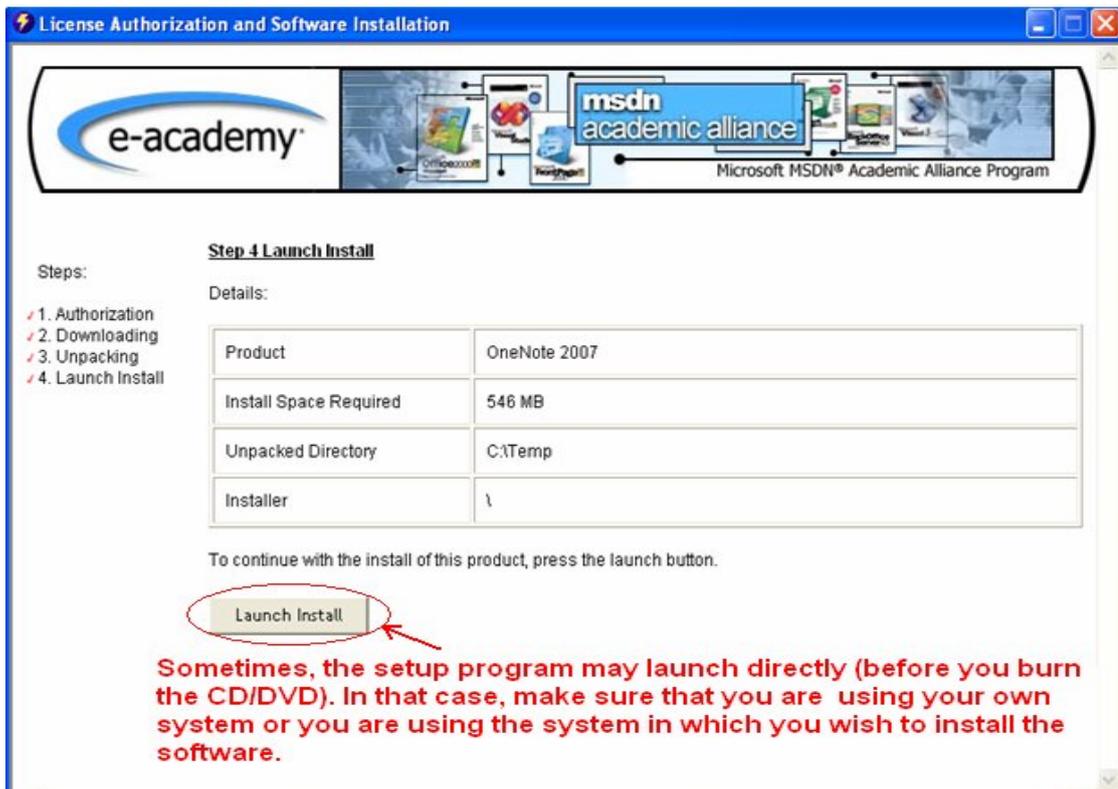

12) If for some reason the download stops, repeat the same procedure as mentioned above and select the same sub-folder to continue downloading from where it had stopped.

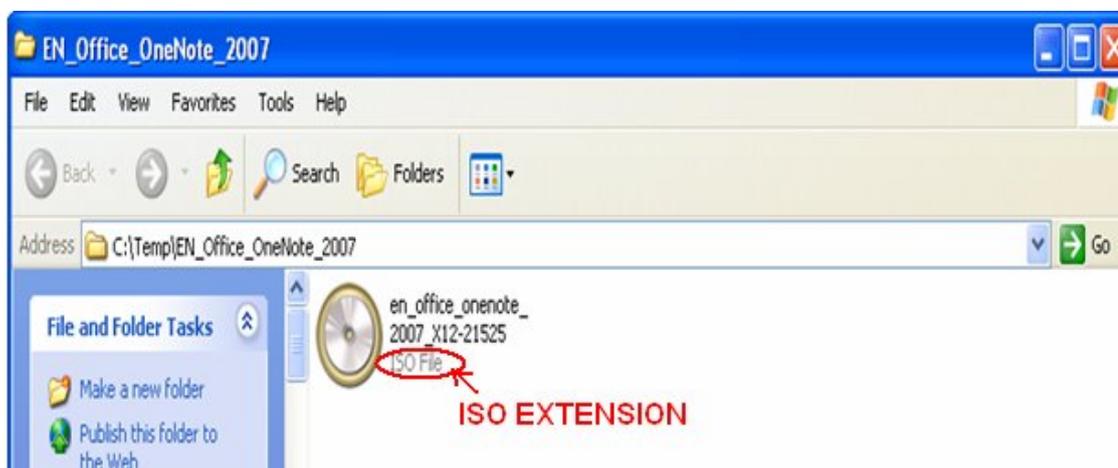

13) This process will download and unpack the software (This may take anywhere from 10 minutes to 2 hours depending on the software title).

- 14) After downloading and unpacking the software, the application will ask you to launch the installation as shown below.

- 15) When you click on “**Launch Install**”, the folder where you downloaded the file opens up. You should see a main file (usually with an .iso or .img extension) and sometimes secondary files containing installation instructions. The icons may vary from the one shown below.

- 16) Change the extension of the main file to .iso if it has an .img extension or if it has no extension.

- 17) Using your CD/DVD burning software, **burn** the ISO image file to your CD/DVD by selecting an option such as “CREATE CD FROM DISK IMAGE”. Different CD/DVD burning software may have different options. What you should look for is the option to burn an ISO file from a disk image.
 - Please do not simply copy the ISO image file to your CD/DVD. You will have to burn it on to a CD/DVD as an image file only so as to expand/extract all setup files correctly. Most of the time simply double-clicking on the image file itself should launch the appropriate CD/DVD burning software.

- 18) For software that comes on multiple CDs, repeat all the steps mentioned above. To install the program insert the disk and follow the setup program instructions.

NOTES:

- If you do not have a CD/DVD burning software, you may download and install a free copy of “ISO Recorder” that will allow you to burn ISO images in Windows XP (a Windows Vista version is also available). Just Google “ISO Recorder” to locate a download location.
- To use this:
 - Select the downloaded ISO file.
 - Right-click and select “Burn ISO File” option from the menu. Follow the on-screen instructions.
