Standardized Patient Program Visits Local High School

by Virginia Rojo

Virginia Rojo, Standardized Patient Coordinator/Simulation Lab Specialist, Ryan Douglas, Simulation Laboratories Information Specialist, and standardized patient volunteer Delyce Ruyle visited Cedar Ridge High School to make a presentation to their Health Science Technology (HST) students on how standardized patient scenarios work in an educational setting. The HST students expressed overwhelming interest and amazement as indicated by their questions and comments.

The Standardized Patient Program is always on the lookout for new actors and actresses. If you are interested in participating in this volunteer program, contact Virginia Rojo at VFR5@txstate.edu.
