**INTERNSHIPS AT GLOBALLY RENOWNED
EVENT & FLORAL DESIGN, VENUE MANAGEMENT COMPANIES**

Sister companies in event-related fields of floral & event design and venue management seek two qualified interns to learn from the event designers behind such global brands as the Screen Actor's Guild Awards, American Idol, Audi and Cadillac. King River Ranch is a world-class wedding & event venue directly on the 290 Wine Trail near Fredericksburg and created by the owner/lead designer of Willem-Aidan, a world-renowned floral & event design studio founded in Beverly Hills, CA in 2003, now at its new home at KRR in the beautiful Hill Country of Texas.

The Venue Intern will have the opportunity to work at a very special venue, one of the '100 Hottest New Venue & Hotel Openings in the World 2016' (the Venue Report) with a remarkably high booking rate for a new venue. Duties will largely be administrative but also include accompanying client tours, returning inquiries, research and working actual events. The Design Intern will work with Willem-Aidan, design studio that created some of the most prestigious events around the world for many years. This intern will learn how to design every aspect of an event; floral, lighting, furniture, tablescape, etc. from beginning to end by helping a very seasoned floral & event designer put them together for a Texas clientele.

Applicants must have an enthusiastic interest in weddings and events, perform well academically, stay calm under pressure, be prepared for late-night hours, be articulate, be organized, and be able to write a professional e-mail.

We are hoping that these interns will become part of a very happy, relaxed, funny, utterly professional and competent team with expansive full-time employment opportunities. Internships are initially unpaid but paid internships will be considered in the future according to performance. A portion of work may be accomplished off-site, although interns are expected to work at least once a week on-site at King River Ranch. Interns are expected to attend client meetings and work events when possible for both site management and design.
