The SWT Honors Program and Mathematics Department hosted the first Honors Math Camp for four weeks in June.

Eleven high school students from Central South Texas and a French exchange student were joined by five undergraduate mentors in the first Honors Math Camp. The participants had the opportunity to grow through challenging experiences such as the LBJ Ranch, and the realization of a dream extended by Everett Anderson's Honors Professorship.

In the fall of 1989, five students were awarded Honors Program recognition pins, which added attractiveness to the program. These pins are awarded to Honors Program graduates and faculty supervisors of Honors thesis.

As a result of the conference, the Honors Program has expanded, providing a variety of courses, seminars, and opportunities for students and faculty. The Honors Program continues to offer a variety of courses and opportunities for students and faculty, as well as continuing expansion of courses, seminars, and opportunities.

Previous recipients of the Honors Program have included Everett Swinney, Merry FitzPatrick, Daniel Farlow, Robert Walls, and Charles Johnson.
