Comprehensive Stuttering Therapy Program

The intensive portion of the CSTP is July 10 - July 20, 2017.

The intensive program will meet daily from 10 am to 6 pm on weekdays.

We only accept 5 participants each summer, so please register early!

The Comprehensive Stuttering Therapy Program (CSTP) is a 2-week intensive clinic designed for adolescents and adults who stutter (12 and older).

Includes approximately 20 hours of group therapy and 40 hours of individual therapy.

Each day will be divided into 2 hour group therapy sessions and 5 hour individual therapy sessions.

In addition to the intensive clinic in July, the CSTP includes an additional semester of follow-up therapy (can be conducted online) to help with retaining skills learned during the summer intensive.

Those interested in registering for summer 2017, please call the Speech-Language-Hearing Clinic:

512-245-8241 or email Dr. Irani:
