

TEXAS STATE VITA

Please note: For all entries, list most recent items first.

I. Academic/Professional Background

A. Name: Michael A. Huston

Title: Professor

B. Educational Background

<i>Degree</i>	<i>Year</i>	<i>University</i>	<i>Major</i>	<i>Thesis/Dissertation</i>
Ph.D.	1982	University of Michigan		The effect of soil nutrients and light on tree growth and interactions during tropical forest succession
M.S.	1977	University of Michigan		
B.A.	1973	Grinnell College	Biology	
No Degree	1971	Deep Springs College		

C. University Experience

<i>Position</i>	<i>University</i>	<i>Dates</i>
Professor , Department of Biology	Texas State University, San Marcos, TX	2003-
Adjunct Professor Faculty of Agricultural and Natural Sciences	University of Western Australia, Perth, WA	2009-2013
Adjunct Professor Department of Civil and Environmental Engineering	University of Tennessee, Knoxville, TN	1999-2003
Adjunct Professor Department of Ecology and Evolutionary Biology	University of Tennessee, Knoxville, TN	1990-2003
Adjunct Professor Department of Geography	University of Tennessee, Knoxville, TN	1990-2003

D. Relevant Professional Experience

<i>Position</i>	<i>Entity</i>	<i>Dates</i>
Executive Director ,	Interdisciplinary Solutions for Environmental Sustainability, Inc (ISESI), Oak Ridge, TN	1999-2006
Senior Scientist ,	Environmental Sciences Division,	1995-2003

Project Leader,	Oak Ridge National Laboratory Walker Branch Watershed Project, Oak Ridge National Laboratory	1988-1993
Research Associate,	Oak Ridge National Laboratory	1983-1995
Research Assistant,	University of Michigan	1978-1982
Teaching Assistant,	University of Michigan	1975-1976

E. Other Professional Credentials (licensure, certification, etc.)

N/A

II. TEACHING

A. Teaching Honors and Awards:

None

B. Courses Taught:

Bio 2410	Fall 2008, 2012	Introductory Botany
Bio 4454/5454	Spring 2004-09, 2012-14	Plant Ecology
Bio 7421	Fall 2004-2007, 2009	Landscape Dynamics
Bio 1320	Fall 2012, 2013	Introductory Biology for Non-majors

Current Concepts of Biodiversity. International Biodiversity Course, Canada Nature Museum and Queen's University, Kingston, Ontario, July, 1997.

Individual-based Models (with L. Persson, A. de Roos, and E. Werner) Nordic Council on Ecology Graduate Seminar, Kronlund Field Station, Sweden, March, 1993

Ecological Regulation of Biodiversity (seminar), Ecology Program, University of Tennessee, Winter, 1993.

Biodiversity (seminar) , Ecology Program , University of Tennessee, Fall, 1991.

Community Ecology (Core course, with Dr. S. Riechert), Ecology Program, University of Tennessee, Fall, 1986.

Coral reefs and species diversity. (Lecture series for graduate course in Marine Ecology), Marine Biological Laboratory, Woods Hole, Mass. July, 1986.

C. Graduate Theses/Dissertations or Exit Committees (if supervisor, please indicate):

Allison Bordini, M.S., Texas State University (Chair, in process)
 Kristine Schaffer, M.S., Texas State University (Chair, in process)
 Kate Seideman-Barclay, M.S., Texas State University (Chair, in process)
 Virginia Brown, M.S., Texas State University (Chair, in process)
 Tim Fotinos, M.S., Texas State University (Chair, 2015)
 Jeremy Henson, M.S., Texas State University (Committee member, 2012)
 Robbie Maxwell, M.S., Texas State University (Committee member, 2012)

- Amanda Birnbaum, M.S. Texas State University (Chair, 2011)
- Frank Davis, M.S., Texas State University (Committee Member, 2011)
- Jed Aplaca, M.S., Texas State University (Committee Member) (2010)
- Kaci Myrick, M.S., Wildlife Biology (committee member) Texas State University (2007)
- Patrice Cole, PhD, Ecology, (committee member), University of Tennessee. (2003).
"Environmental effects on *Microstegium vimineum*, an invasive exotic plant species"
- Jason Fridley, PhD, Ecology, (committee member), University of North Carolina (2002).
"The influence of species diversity on ecosystem productivity in different environments: experimental plant communities and theory."
- Enrique Gomezdelcampo, PhD, Civil and Environmental Engineering, (**Directing** committee member), University of Tennessee (2002). A model of carbon and nitrogen dynamics for temperate grasslands and forests.
- Charles LaFon, PhD, Ecology, (committee member), University of Tennessee (2000) "Patterns and consequences of ice storms in forested Appalachian landscapes"
- Gregory Barlar, MS, Forestry, (committee member), University of Tennessee (2000)
"Temporal and spatial variation in annual growth of yellow poplar (*Liriodendron tulipifera* L.) at Walker Branch Watershed, Tennessee."
- William Rivers, PhD, Ecology (committee member), University of Tennessee, (1999)
"Landscape-level control of population dynamics: Late- Quaternary paleoecology of Beech in Upper Michigan"
- Milena Holmgren, Ph.D. Program in Ecology (**Committee Chair**), University of Tennessee (1996) "Responses of Forest Tree Seedlings to Experimental Variation in Light and Water"
- Michelle Boyd, MS, Ecology, (committee member), University of Tennessee (1998)
"Landscape Ecosystem Classification in the Cherokee Forest - Phase 2"
- Brenda Rashleigh, PhD, Program in Ecology, (committee member), University of Tennessee (1998) "Multi-scale analysis of Unionid freshwater mussel community structure in the Upper Tennessee Basin"
- Gary Huxel, PhD Program in Ecology (committee member) University of Tennessee, (1995) "Influences in community assembly"
- Larry Pounds, Ph.D. Program in Ecology (committee member), University of Tennessee (1995) "A model for multiple preserve selection for endangered plants"
- Charles LaFon, M.S. Program in Geography (committee member), University of Tennessee (1994) "Fifty years of succession on abandoned pastures at the Oak Ridge Reservation, Tennessee: Influences of pre-abandonment land use on vegetation development"

D. Courses Prepared and Curriculum Development:

Bio 4454/5454 Plant Ecology
 Bio 7421 Landscape Dynamics
 Bio 2410 Botany

E. Funded External Teaching Grants and Contracts:

None

F. Submitted, but not Funded, External Teaching Grants and Contracts:
None

G. Funded Internal Teaching Grants and Contracts:
None

H. Submitted, but not Funded, Internal Teaching Grants and Contracts:
None

I. Other:
None

III. SCHOLARLY/CREATIVE

A. Works in Print

1. Books (if not refereed, please indicate)

United Nations Commission on Science and Technology for Development. 1997. ***On Solid Ground: Science, Technology, and Integrated Land Management.*** International Research Development Centre, Ottawa, Canada, 67 pp.

Huston, M.A. 1994. ***Biological Diversity: The Coexistence of Species on Changing Landscapes.*** Cambridge University Press, 708 pp. (10+ published reviews, over 6000 copies sold).

a. Scholarly Monographs: None

b. Textbooks: None

c. Edited Books: None

d. Chapters in Books:

Huston, M.A. 2003. Understanding the effects of fire and other mortality-causing disturbances on species diversity. Pages 51-84 in *Fire in South-Western Australian Forests: Impacts and Management*, N.C. Burrows and I. Abbott, eds. Backhuys Publishers, Leiden, The Netherlands.

Huston, M.A., D. E. Todd, and D.G. Barlar. 2003. Long-term forest dynamics and tree growth on the TDE site, Walker Branch Watershed. Pages 227-254 in *Responses of Eastern Deciduous Forest to Drought*, P.J. Hansen, and S. Wullschleger, eds., Oxford University Press.

- Huston, M.A., M. Holmgren, and M. Kreh. 2003. Responses of understory tree seedling populations to spatiotemporal variation in soil moisture. Pages 417-432 in *Responses of Eastern Deciduous Forest to Drought*, P.J. Hansen, and S. Wullschleger, eds., Oxford University Press.
- Huston, M.A., and A.C. McBride. 2002. Evaluating the relative strengths of biotic versus abiotic controls on ecosystem processes. Pages 47-60 in *Approaches to Understanding Biodiversity and Ecosystem Function*, M. Loreau, S. Naeem, and P. Inchausti, eds. Oxford University Press.
- Schmid, B., A. Hector, M.A. Huston, P. Inchausti, I. Nijs, P.W. Leadley, and D. Tilman. 2002. The design and analysis of biodiversity experiments. Pages 61-75 in *Approaches to Understanding Biodiversity and Ecosystem Function*, M. Loreau, S. Naeem, and P. Inchausti, eds. Oxford University Press.
- Huston, M.A. 2002. Introductory Essay: Critical issues for improving predictions. Pages 7-21 In *Predicting Species Occurrences: Issues of Scale and Accuracy*. J. M. Scott, P.J. Heglund, M.L. Morrison et al. eds. Island Press, Washington, DC.
- Huston, M.A. 1999. Forest productivity and diversity: Using ecological theory and landscape models to guide sustainable forest management. Pages 329-341 in *North American Science Symposium: Toward a Unified Framework for Inventorying and Monitoring Forest Ecosystem Resources*. C. Aguirre-Bravo and C.R. Franco, eds. USDA Forest Service Proceedings RMRS-P-12.
- Huston, M.A., G. McVicker and J. Nielsen. 1999. A Functional Approach to Ecosystem Management: Implications for Species Diversity. Pages 45-85 in *Ecological Stewardship: A Common Reference for Ecosystem Management*, Vol. II, R.C. Szaro, N.C. Johnson, W.T. Sexton, and A.J. Malk, eds. Elsevier Science, Oxford.
- Huston, M.A., and L.E. Gilbert. 1996. Consumer diversity and secondary production. Pages 33-47 In *Biodiversity and Ecosystem Processes in Tropical Rainforests*, ed. G. Orians, R. Dirzo, and J.H. Cushing. SCOPE/Springer-Verlag, Berlin.

- Aldo Leopold, Hans Jenny, or William Albrecht, in Missouri, 1930s: An Ecological Who-done-it. Organized Oral Session, Annual Meeting of the Ecological Society of America, Portland, OR, August 2012.
- The Geography of Injustice: Global Patterns of Poverty and Biodiversity. in Symposium “Geographical Ecology,” at the Association of American Geographers Southwest Division Annual Meeting, Austin, Tx. Nov. 2011.
- The Geography of Injustice. in Symposium “International, Ethnobiological, and Ecological Perspectives on Environmental Justice,” at the 34th Annual Meeting of the Society for Ethnobiology, Columbus, OH, May 2011.
- Environmental constraints on mammalian body size: *Procyon lotor*, *Odocoileus virginianus*, and *Homo sapiens*. Annual Meeting of the Ecological Society of America, Pittsburgh, PA, August 2010. (with Steve Wolverton).
- The Global Distribution of Ecosystem Sustainability and Net Primary Productivity. Annual Meeting of the Ecological Society of America, Albuquerque, NM, August 2009 (with Steve Wolverton, University of North Texas).
- Local spatial variability in body size of white-tailed deer (*Odocoileus virginianus*) and food availability at Fort Hood, central Texas. Annual Meeting of the Ecological Society of America, Albuquerque, NM, August 2009. (Steve Wolverton, Michael A. Huston, , Kevin Cagle, Fort Hood DPW, James H. Kennedy and Alan Farmer, University of North Texas).
- Climate/topography interaction influences spatiotemporal soil moisture variability and resulting plant beta diversity. Annual Meeting of the Ecological Society of America,

- Albuquerque, NM, August 2009. (Timothy A. Fotinos and Michael A. Huston, Texas State University).
- Species richness gradients: Re-evaluating the Mid-Domain Effect null model of diversity patterns. Annual Meeting of the Ecological Society of America, San Jose, CA, August 2007 (with David F. Snyder, Texas State University).
- The effectiveness of a vegetation-based approach for monitoring vertebrate species diversity (Kaci Myrick, Michael Huston, Jeff Hatfield, Floyd Weckerley, and Clay Green). George Wright Society (National Park Service) Meeting, Minneapolis, MN, May 2007.
- Small-scale patterns of plant species richness: Implications for biodiversity and exotic invasion. (T. Fotinos, A. Blair, S. B. Harnden, K. McDermid, A. Adhikari., and M. Huston). Annual Meeting of the Southwestern Association of Naturalists, Stephenville, Texas, April, 2007.
- Tennessee vs. Texas: Comparing patterns of exotic plant invasions, (with P. Barnes, J.W. Johnston, and L. Pounds). Annual Meeting of the Society of Southwestern Naturalists (SWAN), San Antonio, TX, April 2004.
- Land Use Legacy Effects: Exotic Plant Species Distributions Sixty Years After Agricultural Abandonment. (with G. Barlar, W. Johnston, and L. Pounds). Natural Areas Association Annual Meeting, Madison, WI, October 2003.
- The distribution of exotic plant species across a recovering landscape (with G. Barlar, W. Johnston, and L. Pounds). Natural Areas Association Annual Meeting, Asheville, NC, October 2002.
- The global pattern of forest structure and production: reversing the latitudinal gradient. ESA Meeting, Madison, WI, August, 2001.
- Why save biodiversity: can ecosystem function justify species conservation? (with J.P. Grime and D.A. Wardle) ESA Meeting, Snowbird, UT, August, 2000.
- Effects of waterflow variability on population and community dynamics of benthic invertebrates in upper Bear Creek, Oak Ridge, Tennessee (poster, S.M. Harrell, J.G. Smith, and M.A. Huston) ESA Meeting, Snowbird, UT, August, 2000.
- The begets and begats of diversity, productivity, and stability. ESA Meeting, Albuquerque, NM, August, 1997.
- The balance of competition and facilitation in plant communities: a graphical model. ESA meeting, Snowbird, Utah, August, 1995. (Holmgren, M., M. Scheffer, and M. Huston)
- Growth and survival of tree seedlings in a large-scale rainfall manipulation experiment. ESA meeting, Snowbird, Utah, August, 1995. (Parikh, N., M. Holmgren, M. Huston, B. Pedersen, and D. Moe).
- Growth and physiological responses of tree seedlings to experimental manipulation of light and water. ESA meeting, Snowbird, Utah, August, 1995. (Huston, M., and M. Holmgren).
- The 28-year record of ecosystem dynamics on Walker Branch Watershed. ESA meeting, Snowbird, Utah, August, 1995. (Todd, D., M. Huston, B. Pedersen, P. Mulholland, S. Lindberg, D. Johnson, and G. Henderson).
- Spatial distribution of understory plants along gradients of water and light availability. ESA meeting, Knoxville, Tennessee, August, 1994. (Holmgren M., M.A. Huston, J. Quiles and S. Warner)
- Use of a hydrologic model to predict ecosystem properties. ESA meeting, Madison, Wisconsin, August, 1993 (with C.T. Garten, J.W. Chason, S.P Timmins, and D.E. Todd)

- Measuring spatiotemporal variation in canopy leaf area index on a forested landscape, ESA meeting, San Antonio, Texas, August, 1991 (with J. Chason)
- Tulip poplar mortality caused by interacting light and water stress during a severe drought on Walker Branch Watershed, Tennessee. ESA meeting, Snowbird, Utah, August, 1990 (with J. Chason)
- Generation of digital elevation models from contours and comparison of topographic indices. AGU meeting, San Francisco, CA, December, 1989 (with S. Timmins and R.B. Clapp)
- Evaluation of hydrograph predictions from a topographically-based hydrologic model on two watersheds with contrasting geology. AGU meeting, San Francisco, CA, December, 1989 (with R.B. Clapp and S. Timmins)
- The influence of climate, chemical quality and soil fertility on litter decomposition. (Poster with J. Pastor and W.M. Post), ESA meeting, Minneapolis, Mn., June 1985.
- The relationship of species diversity to soil nutrients and moisture on Iowa prairies (with M.J. Huston), ESA meeting, University of North Dakota, 1983.
- The effect of light availability on the biomass and species diversity of a lowland tropical weed assemblage. ESA/BSA meeting, University of Indiana, 1981.
- Dominance and suppression during tropical forest succession: patterns in experimental plantings after two years of growth. ESA/BSA meeting, University of Indiana, 1981.
- The influence of soil nutrients on the growth and distribution of selected species in an experimental oldfield ecosystem. ESA/BSA meeting, University of Indiana, 1981.
- Maintenance of species diversity in tropical forests: experiments in Costa Rica. Soc. for the Study of Evolution, Iowa City, 1981.
- Patterns of species diversity in an experimental oldfield ecosystem, ESA meeting, University of Arizona, 1980.
- Soil nutrients and patterns of early secondary succession in a tropical rainforest. BSA meeting, University of British Columbia, 1980.

2. Invited Talks, Lectures, and Presentations:

- Evolution of the Equilibrium Concept: Seeking Balance in Nature. Organized Oral Session. 100th Anniversary Meeting of the Ecological Society of America, Baltimore, August 2015
- Contributions of Vegetation Science to Ecological Theory: Major Concepts and Misconceptions. Keynote address at 56th Annual Meeting of the International Association of Vegetation Science, Brno, Czech Republic, July 2015
- Dirt is Destiny: Environmental controls on ecology, evolution, economics, and human health. Department of Ecology and Evolutionary Biology, Rice University, Houston, Texas, February 2014
- Dirt is Destiny: Environmental controls on ecology, evolution, economics, and human health. Department of Biology, Colorado College, Colorado Springs, Colorado. October 2013
- Dirt is Destiny. Department of Biology, Oberlin College, Oberlin Ohio. April 2013
- Sustainability by the numbers. Earth Day Seminar for Math Club at Texas State University, April 2013

- “We are wrong about almost everything” The Scientific Struggle to Explain the Distribution, Abundance, and Diversity of Life on Earth. Texas State University, October, 2012
- This is a lot to swallow, we are wrong about almost everything. NSF OPUS PI meeting, NSF, Washington, DC, Sept. 2012.
- Aldo Leopold, Hans Jenny, or William Albrecht, in Missouri, 1930s: An Ecological Who-done-it. Organized Oral Session, Annual Meeting of the Ecological Society of America, Portland, OR, August 2012.
- Global patterns in soils, plants, and people: Implications for everything. Symposium on Biodiversity and Soil Chronosequences. School of Plant Biology, University of Western Australia, February, 2012.
- We were Wrong: Implications of a revised understanding of global NPP for ecology, evolution, and anthropology. National Museum of Natural History, Smithsonian Institution, Washington, DC, August 2011
- The Geography of Sustainability: The Unhappy Intersection of Poverty and Biodiversity. Lecture for Conservation Biology Class, Gonzaga University, Spokane, WA. March 2011.
- The Geography of Sustainability: Global Patterns of Success and Failure. Lecture for Ecological Economics Class, McCoy College of Business, Texas State University, March 2011
- The Geography of Sustainability: The Unhappy Intersection of Poverty and Biodiversity. Philosophy Dialogue Series, Department of Philosophy, Texas State University, March, 2011.
- Correlations among Plants, Animals, and People in Australia: Causes and/or Effects. Introduction to Symposium on Dissecting Australian Diversity: the key to understanding global biodiversity, 50th Annual Meeting of the Ecological Society of Australia, Canberra, AU, December 2010.
- The Geography of Sustainability: Global Patterns of Success and Failure. School of Earth and Environment Sustainability Symposium, University of Western Australia, November, 2010.
- Where the Big Ones Are: Body size patterns in fish, birds, and humans. Faculty of Natural and Agricultural Sciences Seminar, University of Western Australia, November, 2010.
- Implications of an Upside Down World: The Paradox of Global Productivity and What it Means for Ecology and Evolution. Department of Biology Seminar Series, Grinnell College, Grinnell, Iowa, April 2010.
- Implications of an Upside Down World: The Paradox of Global Productivity and What it Means for Ecology and Evolution. Department of Biology Seminar Series, University of Texas at San Antonio, March 2010.
- Implications of an Upside Down World: The Paradox of Global Productivity and What it Means for Ecology and Evolution. Department of Biology Seminar Series, Sam Houston State University, Huntsville, TX, March 2010.
- Biodiversity, Poverty, and Climate. Biology Department Seminar Series, Oberlin College, Oberlin, Ohio, February, 2010.
- The Land of Oz: Is Biology in Australia Unique? or Is it just like the rest of the world? Public Lecture, Albany Campus, University of Western Australia, Albany, WA, July 2009.

- Biodiversity, Productivity, and Speciation: A Model for Australia (and the rest of the World). Academic Lecture, Faculty of Agricultural and Natural Sciences, University of Western Australia, Perth, WA, July 2009.
- The Sustainability of Global Ecosystems: Re-evaluating The Current Paradigm. Public Lecture. Institute of Advanced Studies, University of Western Australia, Perth, WA. July, 2009
- The Sustainability of Global Ecosystems: Re-evaluating The Current Paradigm. Earth Day Lecture, Austin College, Sherman, TX. April 2009
- Rethinking the Planet: The Paradox of Global Productivity and What to do about it. University of Oregon, Biology Seminar Series, Eugene, OR, March, 2009
- Rethinking the Planet: The Paradox of Global Productivity and What to do about it. University of Colorado, Graduate Student Seminar Series, Boulder, CO, October 2008
- Rethinking the Planet: The Paradox of Global Productivity OR What's Wrong with Australia? Faculty of Natural and Agricultural Sciences Lecture, University of Western Australia, Perth, WA, July 2008
- Biodiversity, Poverty, Climate, and Climate Change. Institute for Advanced Studies Public Lecture, University of Western Australia, Perth, WA, July 2008
- Rethinking the Planet: The Paradox of Global Productivity and What to do about it. University of North Texas, Biology Seminar Series, Denton, TX, February, 2008
- Biodiversity, Poverty, and the Specter of Environmental Determinism. Philosophy Dialogue Series, Department of Philosophy, Texas State University, October, 2007.
- Productivity>> Diversity OR Diversity>> Productivity? Technical Seminar, University of Michigan Biological Station, Pellston, MI, July, 2007
- Biodiversity, Poverty, Climate, and Climate Change, Ralph E. Bennett Lecture in Mycology and Plant Biology, University of Michigan Biological Station, Pellston, MI, July, 2007.
- Biodiversity, Poverty, and Climate Change. Earth Day Lecture, Austin College, Sherman, Texas, April 2007.
- The three phases of land use change: Implications for biodiversity and people in Iowa, Texas, and the World. Speaking of Science Lecture Series celebrating the opening of the Estelle Siebens Science Center, Buena Vista University, Storm Lake, Iowa, April 2006
- Testing invasion theory with field data: Implications for management. NSF-sponsored workshop on Invasive Species. University of Indiana, Bloomington, IN, April 2006
- The three phases of land use change: Implications for biodiversity in developed and developing countries. ESA Meeting: Ecology in an Era of Globalization, Merida, Mexico, January 2006.
- The three phases of land use change: Implications for biodiversity in developed and developing countries. El Colegio de la Frontera Sur (ECOSUR), San Cristobal de las Casas, Chiapas, Mexico, November, 2005.
- Global patterns of biodiversity, soils, and poverty. El Colegio de la Frontera Sur (ECOSUR), San Cristobal de las Casas, Chiapas, Mexico, November, 2005.
- The three phases of land use change: Implications for biodiversity in Texas and Iowa. Ninth Annual Dyksterhuis Lecture, Department of Range Science, Texas A&M University, October 2005.

- Testing invasion theory with field data: Implications for management.
NSF/USDA/EPA Joint Meeting on Invasive Species. Washington, D.C. October, 2005.
- The three phases of land use change: Implications for biodiversity in Texas.
Inaugural meeting of NSF NEON Region 11, San Marcos, TX, October 2005.
- The three phases of land use change: Implications for wetlands and biodiversity.
Society of Wetlands Scientists, Annual Meeting of the South Central Chapter, San Marcos, TX October 2005.
- The three phases of land-use change: Implications for agriculture and biodiversity.
Michigan State University, East Lansing, MI, February, 2005
- Global Patterns of Soil and Poverty, Kellogg Biological Station, Hickory Corners, MI, February 2005.
- The three phases of land-use change: Implications for biodiversity. Department of Geography, Texas A&M University, College Station, TX. October, 2004.
- Soil Chemistry and Human Welfare: Understanding Global Patterns of Population, Poverty, and Biodiversity. Seminar Series, Roane State Community College, Oak Ridge, TN, February 2004.
- Hydrology, Topography, and Biodiversity: Understanding Terrestrial-Aquatic Interactions from Local to Regional Scales. Department of Biology. Southwest Texas State University, July, 2003.
- Fire and stand-level patterns of biodiversity: Fire as a generic disturbance. National Council on Science for Sustainable Forestry (NCSSF) Fire Symposium. Research Triangle Park, NC, June 2003.
- The Regulation of Biodiversity. Ecology Program. Colorado State University, Fort Collins, CO. February, 2003.
- Why ecologists are so confused: finding a signal in the noise. Graduate Student Seminar Series, Utah State University, Logan, Utah, October, 2002.
- The global pattern of forest structure and growth: implications for conservation and development. Graduate Student Seminar Series, Utah State University, Logan, Utah, October, 2002.
- Environmental drivers of land use change. (with H. Gibbs). Symposium on Land use change in rural America: Rates, drivers, and consequences. ESA Annual Meeting, Tucson, AZ, August, 2002.
- The global pattern of forest structure and productivity: implications for biodiversity, carbon sequestration, and Australia. Faculty of Agriculture, University of Western Australia, Perth, April, 2002.
- Fire and ecological disturbance theory. Keynote presentation. Symposium on Fire in Western Australia, Conservation and Land Management agency of Western Australia, Perth, April, 2002.
- Predicting the distribution and abundance of exotic plant species. Fourth Annual Meeting of the Southeastern Exotic Pest Plant Council, Nashville, TN, April, 2002.
- The irrelevance of standard statistical analyses of experimental and observational data in ecology. Department of Biology, The University of North Carolina, Chapel Hill, NC, March 2002.
- Topography, soils, and biodiversity: Implications for ecologists and engineers. Department of Civil and Environmental Engineering, The University of Tennessee, Nov. 2001.

- Contributions of ecosystem ecology to conservation planning and reserve management. Workshop on Ecologically Functioning Populations, Wildlife Conservation Society, White Oak Plantation, Yulee, FL, Nov. 2001.
- Predicting the distribution and abundance of exotic plant species. Symposium on Exotic Species, Natural Areas Association, Cape Canaveral, FL, Oct. 2001
- Parallels between terrestrial and marine biodiversity patterns and processes. The Centre for Marine Biodiversity. Bedford Institute of Oceanography, Halifax, Nova Scotia. May, 2001.
- The history and current status of the biodiversity-ecosystem function controversy. Dalhousie University, Halifax, Nova Scotia, May, 2001.
- The global pattern of plant mass and productivity: common wisdom strikes out again; The dynamic equilibrium model: a framework for understanding and managing biodiversity in forests and rangelands; Dirt is destiny: balancing conservation and economics in land management. Three lectures in the Colorado State University Distinguished Ecologist Lecture Series. Feb. 2001.
- Linking Evolution and Ecosystems: A Research Agenda for the 21st Century. Department of Botany, University of California, Riverside, Jan. 2001.
- Biodiversity in landscape decisions. NCASI Conference on Forest Environment Management: Forest Landscape Management in the Real World. Portland, OR. Sept. 2000.
- The environmental basis of human society. Conference on Land Use: Changing Landscapes of Rural America. Yellowstone National Park, WY, Sept. 2000.
- Understanding the common constraints on man and nature. Environmental Studies Program, Washington and Lee University, Feb. 2000.
- Dirt is Destiny: common constraints on plants, animals, and people. Leadoff address for graduate-student organized symposium, Integration across Ecological Scales, Feb. 2000, Texas A&M University.
- Impediments to predictive models in community ecology: Misunderstandings of processes, scales, and statistics. Keynote address for international conference, "Predicting species occurrences: issues of scale and accuracy for wildlife habitat modeling," October, 1999, Snowbird, Utah.
- Plant species diversity: What processes, what scales? Department of Biology, University of North Carolina, Sept. 1999.
- Application of ecological principles to the planning and evaluation of ecosystem restoration. Symposium on Environmental Monitoring, Annual Meeting of the Ecological Society of America. Spokane, WA, August, 1999.
- Extracting experimental results from long-term monitoring studies: lessons from droughts and floods. Symposium on Serendipity in Environmental Research, Annual Meeting of the Ecological Society of America. Spokane, WA, August, 1999.

One or more of the following talks given at each of the Australian institutions listed below

- Misguiding the Field of Ecology: Fundamental Concepts and Misconceptions
- Restoring the Florida Everglades: Applications of Computer Models to Ecosystem Assessment and Management
- Evaluating the Ecosystem Function of Biodiversity: A critique of recent experiments

Spatial Scale and Ecological Processes: Local versus regional control of species diversity
Evaluating the Dynamic Equilibrium Model of Species Diversity: Twenty Years of Relevant and Irrelevant Analyses
Endemism and Invasions: Predicting the distributions of rare and problem species.
Understanding and managing the patterns of biodiversity on landscapes
Biodiversity conservation, sustainable development and social justice
The Latitudinal Gradient of Species Diversity: What's Rapoport got to do with it?

Australian Institutions visited, January through March, 1999

University of Adelaide

Department of Botany

Waite Institute of Agriculture

Centre for Research on Introduced Marine Pests

CSIRO Marine Science Laboratory, Hobart, Tasmania

University of Sydney

Centre for Research on Ecological Impacts of Coastal

Cities,

Marine Ecology Laboratories

James Cook University, Townsville, Queensland

Department of Marine Biology

CSIRO Division of Wildlife and Ecology, Canberra, ACT

Australian National University, Canberra, ACT

Center for Plant Biodiversity

University of Western Australia, Perth, WA

Soil Science and Plant Nutrition

Department of Botany

Using computer models and ecological theory to plan ecosystem inventories and monitoring. North American Science Symposium "Toward a Unified Framework for Inventorying and Monitoring Forest Ecosystem Resources, Guadalajara, Mexico, Nov. 1998.

Reconciling scales and processes: the key to a general theory of species diversity. Symposium on Seeking Generality in Ecology. Annual Meeting of the Ecological Society of America. Baltimore, MD, August, 1998.

Belowground processes and the interaction of productivity and diversity. Institute for Microbial Ecology, Michigan State University, March, 1998.

Misleading the field of ecology: how the search for simplicity leads to irrelevance. Arthur Cronquist CUNY Graduate Students Plant Sciences Symposium, November, 1997

Multimodeling for South Florida Wetland Ecosystems (with L.J. Gross), Symposium on Technology for Landscape Simulation and Analysis. International Society for Ecological Modeling, Providence, RI, Aug., 1996.

Modern computation and conservation biology: giving theory some muscle (with L.J. Gross, presenter), Symposium on The Interface between Theoretical Ecology and Conservation Biology. Society for Conservation Biology Annual Meeting, Providence, RI, Aug. 1996.

Biodiversity and Sustainability, Air & Waste Management Association National Meeting, Nashville, TN, June, 1996

- The effects of climate change on a deciduous forest: experiments on Walker Branch Watershed, Tennessee. Grinnell College, Feb. 1996.
- The regulation of plant community structure on landscapes, Department of Botany, University of California, Riverside, Jan. 1996.
- Global patterns of agricultural productivity and biodiversity, Department of Biology, University of California, Riverside, Jan. 1996.
- The scientific basis of managing genetic and species diversity. Ecological Stewardship Workshop, Tucson, AZ, December 1995.
- Global patterns of plant productivity: implications for conservation and development. University of Montreal, December, 1995.
- Biological Indicators: a research perspective. National Association of Environmental Professionals, Washington, DC, June, 1995.
- Plant species diversity: global patterns and local processes. Southwestern Texas University, San Marcos, TX, April, 1995.
- Agriculture and Biodiversity. School of Natural Resources, University of Michigan, March, 1995.
- The environmental necessity for free farm trade. 1995 Farm Policy Conference, Washington, DC February, 1995.
- Patterns of diversity on grasslands: global perspectives. University of Arizona, Tucson, May, 1994.
- Global distribution of soil resources: implications for sustainable development. Sustainable Development Forum, Chicago Area Sigma Xi, March, 1994
- Integrating local ecosystem processes to address global issues. DOE Workshop on "New Research in the Science of Global Change: A multidisciplinary View," Oakland, California, September 1993.
- Resource mobility, competition, and the diversity of sessile organisms. XV International Botanical Congress, Tokyo. September, 1993.
- Soils, biodiversity, and sustainable development in lowland tropical rainforests. XV International Botanical Congress, Tokyo. September, 1993.
- Individual-based models of plant interactions. Lectures for Nordic Council on Ecology Course on Individual-based Models. Kronlund Field Station, Sweden, March, 1993.
- Biological diversity: global patterns and local processes. University of Kentucky, Lexington, January, 1993.
- Biological diversity: global patterns and local processes. Grinnell College, Grinnell, Iowa, Sept. 1992.
- Integrated ecosystem research on Walker Branch Watershed, Emory University, Atlanta, July, 1992
- Biological diversity: global patterns and local processes. Savannah River Ecology Laboratory, Aiken, SC, May, 1992
- Global patterns of biological diversity. University of Ottawa, Ottawa, Canada. April 1992
- Individual-based forest succession models. School of Forestry, University of Washington, Seattle, Washington. February, 1992.
- Productivity, disturbance, and species diversity. Conference on microbial diversity. Michigan State University, June, 1991.
- Plant physiology, competition, and the regulation of species diversity. Duke University, February, 1991.

Integrating plant physiology, population dynamics, and ecosystem processes. Midwest Population Biology Conference, Miami University, Ohio, October, 1990.

Research issues and opportunities on Walker Branch Watershed. University of Tennessee, September, 1990.

The role of plant physiology in ecosystem processes: examples from Walker Branch Watershed, Vanderbilt University, April, 1990

Application of individual-based modeling techniques to ecosystem processes on Walker Branch Watershed. Clemson University, November, 1989.

Use of individual physiology and life history to predict community and ecosystem dynamics. Symposium: Methods for translating ecological information across scales. ESA meeting, Toronto, August, 1989.

From physiology to ecosystems: a theory based on individual organisms. University of North Carolina, Chapel Hill. October 1988.

From physiology to ecosystems: a theory based on individual plants. Institute of Ecosystem Studies, Cary Arboretum. May 1988.

Community and ecosystem patterns in dynamic landscapes. Michigan State University Kellogg Biological Station. May 1987.

Community and ecosystem patterns in a dynamic landscape. Speaker and organizer for symposium: Ecosystem and community implications of population processes, ESA/INTECOL meetings, August 1986.

Light availability and the species diversity of sessile photosynthetic communities in terrestrial and marine environments. Symposium: Factors affecting coral reef benthic community structure, ESA/ASLO meeting, Minneapolis, Mn, June 1985.

Light availability and species diversity in coral reefs and understory plant communities. University of Georgia, February 1985.

Modeling the effects of geology and climate on ecosystem properties. MAB workshop on remote sensing, Athens, Georgia, May, 1985.

The role of symmetric and asymmetric competition in determining plant population size structure, Symposium: Size hierarchies in plant populations, ESA meeting, University of North Dakota, 1983.

Species diversity in oldfield plant communities (with F.C. Evans), Symposium: Plant community ecology - community structure and pattern, ESA meeting, Pennsylvania State University, 1982.

The regulation of species diversity: experimental data from three systems. University of California, Santa Barbara, 1982.

Coral reefs and tropical rain forests. University of New Orleans, 1981.

Species diversity in coral reefs and rain forests: a non-equilibrium explanation. University of Minnesota, 1978.

3. Consultancies:

Office of the White House, Panel Member and Writing Coordinator, Interagency Task Force for Environmental Research and Monitoring, Office of Science and Technology Policy, 1995.

UN Commission for Sustainable Development, Consultant and Lead Author for land management report, 1994-1995.

South Florida Task Force for Everglades Restoration, Workshop Facilitator for Science Subgroup, Miami, FL, 1994.

4. Workshops:

Symposia Organized and Chaired:

External Influences on Ecological Theory: The Effects of Economic, Sociopolitical, Climatic, and Other Conditions. Organized Oral Session for 100th Anniversary Meeting of the Ecological Society of America, Baltimore, August 2015.

International, Ethnobiological, and Ecological Perspectives on Environmental Justice (co-organized with Steve Wolverton), 34th Annual Meeting of the Society for Ethnobiology, Columbus, OH, May 2011.

Dissecting Australian Diversity: the key to understanding global biodiversity, 50th Annual Meeting of the Ecological Society of Australia, Canberra, AU, December 2010.

The biophysical landscape: implications for ecological, economic, and cultural processes, ESA annual meeting, 1997.

Oak Ridge Climate Change Symposium, Oak Ridge Associated Universities, Oak Ridge, TN, 1994.

Regional Watershed Research Symposium, Oak Ridge Associated Universities, Oak Ridge, TN, 1993.

Regional Watershed Research Symposium, Oak Ridge Associated Universities, Oak Ridge, TN, 1992.

Regional Watershed Research Symposium, Environmental Sciences Division, Oak Ridge National Laboratory, 1991.

Individual-based Models and Approaches in Ecology, University of Tennessee, Knoxville, TN, 1990.

Regional Watershed Research Symposium, Environmental Sciences Division, Oak Ridge National Laboratory, 1990.

Ecosystem and community implications of population processes, ESA/INTECOL meetings, Syracuse, New York, 1986.

5. Other:

C. Grants and Contracts

1. Funded External Grants and Contracts:

Global Biodiversity: Synthesis of Ecology and Evolution. Research, data analysis, travel, in support of writing a major new book presenting a unified theory of the evolution on distribution of life on Earth. Work performed at Texas State University – San Marcos, and during international travel to meeting with colleagues. Funded by the NSF OPUS

Program (Opportunities for Promoting Understanding through Synthesis). (M. Huston, PI, \$165,085, 1/1/2010 – 12/31/2011).

Predicting the distribution and dominance of exotic species across the landscapes of the Southern Appalachians. Quantitative field surveys and experiments across landscape gradients on the Oak Ridge National Environmental Research Park, Great Smoky Mountains National Park, and Big South Fork National Recreation Area. (M. Huston, P.I., \$150,000/yr, 2001-2004 (with no-cost extension to 2006 for work in Texas), grant to Interdisciplinary Solutions for Environmental Sustainability, Inc. (ISESI), funded by EPA National Center for Environmental Research, Office of Research and Development)

Hydrology-vegetation interactions on the South Florida Landscape. Landscape-scale simulation for evaluating ecological effects of hydrologic restoration alternatives for Everglades/Big Cypress (South Florida Restudy). The hydrology/vegetation model provides the foundation for higher trophic level models (e.g., wading birds, panthers, snail kites) that are part of the Across Trophic Level System Simulation (ATLSS) program (grant to the University of Tennessee, funded by the USGS Biological Research Division, and the Army Corps of Engineers) (M. Huston and L. Gross, PIs, ~\$230,000/yr, 1995-99)

Use of Multi-scale Biophysical Models for Ecological Assessments: Applications in the Southeastern United States. Landscape analysis and modeling project focusing on predicting spatiotemporal variability in terrestrial and aquatic ecological properties across landscapes at a range of spatial scales in the Southern Appalachian region. (M. Huston, P.I., ~\$570,000/yr, 1996-2000, grant to the University of Tennessee funded by EPA National Center for Environmental Research and Quality Assurance)

Walker Branch Watershed, long term research on community and ecosystem processes on a forested watershed. Project Leader in charge of conceptual integration and direction of multi-investigator research on forest succession and productivity, nutrient cycling, hydrology, and response to climatic variation (1988-1993, ~\$1,000,000/yr, funded by DOE Office of Health and Environmental Research grant to Oak Ridge National Laboratory). Current research focuses on response of oak-hickory forest to climate change using experimental rainfall manipulation (Throughfall Displacement Experiment).

Nutrient availability at a lowland tropical site on volcanically derived soils: Interactions of microbial, vegetation, and abiotic processes (with G.P. Robertson and P. Sollins) (NSF BSR-8317198, \$200,000, funded for two years, 1984-1985)

Long-term effects of mowing and fertilization (4 x 4 factorial design) on biomass, species composition, and nutrient cycling in an oldfield plant community. Experiments established in 1978 and continued until 1988 at University of Michigan Botanical Gardens. \$60,000 NSF Grant to Francis Evans, University of Michigan, 1979-1983.

2. Submitted, but not Funded, External Grants and Contracts:

Too numerous to list

3. Funded Internal Grants and Contracts:

None

4. Submitted, but not Funded, Internal Grants and Contracts:

None

D. Fellowships, Awards, Honors:

- 2008 **ISI Highly Cited Scientist** in Ecology and Environmental Science, since 2002 (over 6000 citations, the only Highly Cited Ecologist in Texas).
- 2008-2010 **Professor-at-Large**, University of Western Australia, Perth, WA
- 2007 **Ralph E. Bennett Lecturer** in Mycology and Plant Biology, University of Michigan Biological Station, Pellston, MI, July, 2007.
- 2005 **Dyksterhuis Lectureship**, Department of Range Management, Texas A&M University.
- 2000 **Technical Achievement** Award from UT-Battelle for international leadership in addressing the relationship between biodiversity and ecosystem function
- 1998 **Technical Achievement** Award from Lockheed Martin, for publication on design of biodiversity experiments.
- 1997 **BER 50 Exceptional Service Award** from DOE Biological and Environmental Research Program at 50th Anniversary Symposium for work on ecosystem functioning and biodiversity (other recipients included Warren Washington, Jay Edmonds, and Craig Venter).
- 1996 **Author of the Year** Award from Lockheed Martin, for publication of book on biological diversity
- 1996 **Technical Achievement** Award from Lockheed Martin, for publication of book on biological diversity
- 1996 **Technical Achievement** Award from Lockheed Martin, for continuing leadership in the field of ecology.
- 1995 **Technical Achievement** Award from Martin Marietta, for contributing to integration of ecology and economics.
- 1995 **Distinguished Scientist** Award, Environmental Sciences Division, Oak Ridge National Laboratory
- 1990 **Award of Distinction** (First Place) in the International Competition of the Society for Technical Communication in category of Scholarly and Technical Articles, for "New Computer Models Unify Ecological Theory," coauthored with D.L. DeAngelis and W.M. Post.
- 1983 **Eugene P. Wigner Post-Doctoral Fellowship**, ORNL
- 1982 **Organization for Tropical Studies** - Noyes Fellowship
- 1980 **Organization of American States** Research Fellowship
- 1978 **Charles Lindberg Foundation** Grant
- 1976 **NSF Predoctoral Fellowship**

1972 **Phi Beta Kappa**, Grinnell College
 1968 **National Merit** Scholarship

IV. SERVICE

A. University:

2009 “Whole-Mind” Common Experience Committee
 Religion and Science Public Discussion, Panel Member, Center for
 Multicultural and Gender Studies, Texas State University, April 2009
 College of Science REP Review Committee, 2005-2007.
 2007 Common Experience Committee
 Member, Biology Chair Search Committee, 2004, 2005

B. Departmental:

Faculty Advisor, Student Entomology Club 2015 -
 Chair, Aquatic Ecology Search Committee, 2006.
 Organizer, Friday “How I Became a Scientist” seminar series. 2004-2008
 Member, Land Use Committee 2005-2008
 Chair, Ad Hoc Field Station Assessment Committee 2008
 Head, Freeman Ranch Research Planning Committee

C. Community:

Vestry, St. Mark’s Episcopal Church, San Marcos, TX
Environmental Quality Advisory Board, Oak Ridge, TN, 1986-1988
Tennessee Citizens for Wilderness Planning, Member 1986 -2008
Vestry, St. Stephen’s Episcopal Church, 1993-1996, 1998-2001
Cub Scout (Webelos) Den Leader, 2000-2002
Rotary Club of Oak Ridge, 2000-2004
Tennessee Interfaith Power and Light, Ecumenical organization to support energy
 conservation and use of renewable energy sources, charter member, 2001.
Oak Ridge High School Parent Teacher Student Organization, Treasurer, 2002-
 2004.

D. Professional:

Review Panels:

EPA Regional Synthesis Panel, June, 1997
 USDA Competitive Grants, May, 1995
 NSF Site Review Team, Center for Ecological Synthesis, September, 1994.
 USFS Biodiversity Program Review, Savannah River Site. May, 1994
 EPA Ecosystem Stress Detection Panel, Oct. 1991, May, 1992,

Jan. 1993

NSF LTER Site Review Team, Desert Ecosystems, June, 1992.
DOE Southeastern National Institute of Global Environmental
Change (NIGEC) Panel, 1992, 1993
NSF Restoration and Conservation Biology Panel, 1992, 1995.
DOE Hollaender Fellowship Panel, Apr. 1992.

Editorial Boards:

PeerJ online journal, Editorial Board, 2012 -
**Diversity and Distributions: A Journal of Biological Invasions and
Biodiversity**, Editorial Board. 1999 -
Ecology and Ecological Monographs, Associate Editor, 1996-2000.
Journal of Vegetation Science, Editorial Board 2011-2013

Program Planning:

NSF National Ecological Observatory Program (NEON). Leadership role in organizing regional collaborations in NEON Region 11, which includes most of Texas and part of Oklahoma. Serve as member of regional steering committee, setting priorities for the region and coordinating collaborative interactions (2005 -). Participated in national planning meeting for planning NEON implementation, November, 2006. Organized site visits.

Climate Change Research Program, Moderator and writing team member on priority research issues, Interagency Ecosystems Working Group, February 2004.

Ecological Stewardship Project, Lead author for Genetic and Species Diversity, Sponsored by U.S. Forest Service, other land management agencies and private foundations, Tucson, Arizona, December, 1995.

Press Interviews:

USA Today, Traci Watson, Land Use and Biodiversity, Aug. 18, 2009

E. Organizations

1. Honorary:

Phi Beta Kappa

2. Professional:

Ecological Society of America,
Ecological Society of Australia,
Association for Tropical Biology,
American Association for the Advancement of Science.
American Institute of Biological Science
American Geophysical Union

F. Services Honors and Awards:
