

Terry Costa

Terry Costa offers an internship opportunity second to none for your school and your students! Allow me to briefly describe the Terry Costa Internship program and explain how it pertains to you. The management team that steers this program is interested in nurturing an effective and mutually rewarding relationship between our business and your students. **We are currently accepting applications and conducting interviewing for unpaid Spring and Summer internship positions.**

The current work environment demands field experience, and students often find themselves carrying a degree but not enough job related exposure. Terry Costa answers this call by providing a well-rounded journey through all aspects of small business in this current, volatile economy.

Although one might initially only consider us a match for fashion related industry majors, we have opportunities for individuals who thrive in:

- public relations
- marketing
- management
- merchandising
- communications
- special event planning

We believe a student possessing any of the above skills could fine-tune them by participating in a **REAL** (no envelope stuffing) job opportunity at Terry Costa. Our management team possesses degrees in a variety of areas, and there is a constant blending of ideas (both creative and practical) about all aspects of running a business. The small size of the business creates an ideal learning situation for an intern, as he or she will be included in all managerial discussions and decisions.

Whether a requirement for graduation, a needed class credit, or a wise suggestion in order to prepare for the workplace/workforce, Terry Costa can fit into any schedule. Students will find the experience that future prospective employers will demand.

Please let us know if you have any questions or concerns with regard to our Internship Program. Please pass this information directly on to your students. Thank you for your time.

Sincerely,

Misty Capps
Assistant Manager
Intern Program Supervisor
