J. Fischer-Student Rep.
Guest: Ernest Ratliff

Council absent:
D. Perkins-Applied Arts
D. Showalter-Business Administration
D. Wiley-Education
D. Glassman-Chair
J. Crawford-Chair

Motion:
R. Brown asked for a motion to approve the minutes from October 14th. C. McCall so moved. B. Stone seconds the motion. The October 14th minutes were approved as prepared.

Early next Spring Dr. Gratz will meet with the Council and we will discuss the Science Component.

If a department wants to add a course to the General Education Core Curriculum (GECC) they need to get the description of the component and the fill out the appropriate form and then talk with Dr. Brown personally about the course.

Request to add Math 1329 to the GECC:
Discussion:
-It is the 2nd portion of business math
-Students are coming to college with higher levels of knowledge in math and can start in higher levels of math class by testing out or being placed into 1329—lets give students more value for their knowledge
-Math 1329 is a substantial course that has the right skills and is broad based
-Placement is the course by SAT and ACT scores (the same score they use to let students into pre-cal are used to let students into this course)
-Mostly Business students and maybe some Computer Science students use this course
-Is it more of a major requirement than just a General Education requirement?
-About 10% of Business students will be helped with this addition to the GECC, but most will still have Math 1319 prior to taking Math 1329.

**Motion:**
B. Stone asked for a motion to accept Math 1329 to the General Education Core Curriculum under the Math Component.

B. Melzer seconds the motion. The motion passed unanimously.

In the spring the Council will look at the proposed addition to the GECC from Criminal Justice when the Council reviews the syllabi for Social Science courses.

R. Brown will also contact Mass Communications and Agriculture to present their proposed courses in the spring.

Meeting adjourned at 3:51 p.m.
