

## MONOFILAMENT REMOVAL

1. Do not attempt removal of line if conditions are unsafe.
2. *Optional:* Document line & location with photos.
3. Collect with gloves, remove material or hooks, & secure line in a container.
4. Note location & amount removed.
5. Monofilament: Find a station on our website & recycle.
6. Other line (braided or with wire): Cut into 6-inch pieces & put in the trash.
7. **TST Citizen Scientists:** Enter data on your water quality datasheet.
8. **Others:** Enter data & submit photos at [TxMonofilament.org](http://TxMonofilament.org).

\*Monofilament is the most common fishing line. It is a single-strand, high-density nylon line. Only monofilament line is recyclable. Refer to #6 for other line.
