Sociology contributes both to the classic liberal arts tradition and to the practical application of the liberal arts to the world of work. The Department of Sociology provides academic advising and encourages all students considering a major in sociology to take advantage of these services. Suggested degree plans, while helpful in planning an academic schedule, should not be used in lieu of academic advising.

Sociology majors may choose the Bachelor of Arts, major in Sociology, which prepares them for professional or graduate study in the liberal arts tradition, or the Bachelor of Science, major in Applied Sociology, which provides practical research skills for students who wish to attend graduate school or to enter the work
force upon graduation. The BA in sociology is a 36-hour degree
for students interested in entering the professions. As such, it is a
pre-professional degree that includes courses designed to prepare
students for professional or graduate study. The BS is a 36-hour
major designed for students who intend to apply sociological
principles and practices in governmental and business settings.
Students who are interested in collecting, analyzing, interpreting,
and presenting data on a variety of social phenomena may select
the BA or the BS.

Majors in both degree programs learn to conduct social research,
to work with computers, and to enhance the practical skills of
writing and analysis. Graduates enter a variety of fields, including
law, management, education, the ministry, public administration,
and human resource management in business, government and
industrial settings.
