SECTION 3: HEALTH HAZARD DATA

Routes of Entry:

Inhalation: YES   Skin: YES   Ingestion: Accidental

Health Hazards (Acute and Chronic): Chronic effects may include kidney and/or liver damage.

Carcinogenicity: NTP: Not listed
IARC Monographs: Not listed
OSHA Regulated: Not listed

Signs and Symptoms of Exposure:

INHALATION: Inhalation of vapors may cause irritation of nose and throat, coughing, headache, nausea, vomiting, dizziness, drowsiness, irritation of upper respiratory tract, narcosis, central nervous system depression, difficult breathing, pulmonary edema, chest pains and loss of consciousness. Overexposure may be fatal.
EYE CONTACT: May cause irritation. May result in temporary corneal damage.

SKIN CONTACT: May cause irritation. Prolonged skin contact may result in dermatitis. May be rapidly absorbed by skin.

INGESTION: May cause nausea, vomiting, headache, dizziness, gastrointestinal irritation, narcosis, central nervous system depression and loss of consciousness. Overexposure by ingestion may be fatal.

Conditions Generally Aggravated by Exposure: Respiratory system disease, skin disorders, pulmonary disease.

SECTION 4: EMERGENCY AND FIRST AID PROCEDURES

INHALATION: If inhaled, remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Prompt action is essential.

EYE CONTACT: In case of eye contact, immediately flush with plenty of water for at least 15 minutes while holding eyelids open.

SKIN CONTACT: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before re-use.

INGESTION: Call a physician. If swallowed, do NOT induce vomiting unless directed to do so by a physician.

SECTION 5: FIRE AND EXPLOSION HAZARD DATA

Flash Point (Method Used): 40°F (4°C) Closed Cup

Flammable limits: LEL: 1.2  UEL: 7.1

Extinguishing Media: Use alcohol foam, dry chemical, or carbon dioxide. Water may be ineffective.

Special Firefighting Procedures: Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece operated in positive pressure mode. Move containers from fire area if it can be done without risk. Use water to keep fire-exposed containers cool.

Unusual Fire and Explosion Hazards: Vapors may flow along surface to distant ignition sources and flash back. Closed containers exposed to heat may explode. Contact with strong oxidizers may cause fire.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Steps to be taken if material is released or spilled: Wear self-contained breathing apparatus and full protective clothing. Shut off ignition sources; no flares, smoking, or flames in area. Stop leak if you can do so without risk. Use water spray to reduce vapors. Take up with sand or other non-combustible absorbent and place into container for disposal. Flush area with water.
SECTION 7: EXPOSURE CONTROLS -- PERSONAL PROTECTION

Respiratory Protection: Respiratory protection is required if airborne concentration exceeds TLV. At concentrations up to 1000 ppm, a chemical cartridge respirator with organic vapor cartridge is recommended. Above this level, a self-contained breathing apparatus is recommended.

Ventilation: Use general or local exhaust ventilation to meet TLV requirements.

Local Exhaust: Keep below TLV
Mechanical: Keep below TLV
Special: N/A
Other: N/A

Protective Gloves: Polyethylene or neoprene gloves are recommended.

Eye Protection: Safety goggles and faceshield are recommended.

Other Protective Clothing or Equipment: Neoprene apron is recommended.

Work / Hygienic Practices: Wash thoroughly after use.

SECTION 8: HANDLING AND STORAGE

Precautions to be taken in handling and storing: Keep containers tightly closed. Store in cool, dry, well-ventilated, flammable liquid storage area.

Other Precautions: Bond and ground containers when transferring liquid.
