Stuttering therapy will be offered as a two-week residential intensive program with up to one year of follow-up via videoconferencing.*

- The intensive program begins July 11, 2011
- Includes 60 hours of direct therapy offered from 10 a.m. to 4 p.m. daily. Includes two hours of group therapy every morning.

*Due to state licensure laws, follow-up therapy can be offered only to Texas residents.

Cost
- The cost for the inaugural CSTP-A is $200**
- This fee covers all therapy costs, and the cost of living in university dormitories during the intensive program.

**Further scholarships may be available on a need basis – call to inquire.

Treatment Philosophy
We believe stuttering is a multidimensional disorder, best treated by a multifaceted approach that considers individual needs. The CSTP-A is designed to provide structured therapy that addresses various aspects of stuttering in an individualized format. The CSTP-A's primary objectives are:

- Increase understanding and knowledge about stuttering
- Learn speech techniques to deal with stuttering effectively in daily life
- Practice learned techniques regularly in real-life situations
- Increase control over fluent speech production and reduce severity of stuttering moments
- Recognize and address maladaptive reactions to stuttering, and promote healthy acceptance of stuttering
- Develop skills to deal with a variety of real life situations independently and become one's own clinician

The CSTP-A is limited to five clients, so please register early.

Comprehensive Stuttering Therapy Program for Adults (CSTP-A)
The Department of Communication Disorders and the Speech, Language and Hearing Clinic announce the inaugural Comprehensive Stuttering Therapy Program for Adults (CSTP-A). The CSTP-A is coordinated by Dr. Farzan Irani, whose research focuses on treatment outcomes for adults who stutter. He has published studies on the topic and presented at national conventions.

The CSTP-A is supported by the clinical supervisors, graduate students and clinic staff.

CSTP-A Structure
- The CSTP-A offers evidence-based approach to stuttering therapy.
