We would like to welcome Dr. Yvonne Eixmann back to the Department of Management this fall. Although Dr. Eixmann has taught for the department on a part time basis for many years, after a brief stint in Accounting, she is now a full time lecturer and will be teaching Organizational Behavior (MGT 4375) and Human Resource Management (MGT 4373). She was born in Sugarland and raised in Rosenberg, Texas, and attended the University of Houston. She completed an undergraduate degree in Accounting and then her master’s degree in Management while working as a financial analyst at Exxon. Eixmann then moved to College Station where she spent nearly nine years as a stay-at-home mom with her three children (now 31, 29 and 25) prior to returning to work in auditing for Texas A&M. She left auditing to pursue a PH.D. in Human Resource Development at Texas A&M University. After moving to the hill country, she had a short stint in Grants at the Texas Health Department and taught at Austin Community College. Later, she became the Director of Auditing at Texas State University serving for nearly twelve years. During that time, she completed her dissertation earning her Ph.D. and began teaching management classes one night a week for the department, including some of the first ITV classes to Round Rock. When she is not busy with work, she enjoys spending time with her husband, Brad, who also works and teaches Horticulture at Texas State, and their two dog children, Spot and Sadie Marie. Eixmann also enjoys participating in creative house projects in her home. She loves working with aspiring students as well as learning from them, “They always keep me on my toes!” said Eixmann. Welcome back to the Department of Management, Dr. Eixmann!

Faculty News

Dr. Brian Miller and Dr. Jim Bell had their empirical research article, co-authored with two recent Texas State MBA graduates Matt Palmer and Andres Gonzalez, accepted for publication in the Journal of Business and Entrepreneurship. It is titled: “Predictors of entrepreneurial intentions: A quasi-experiment comparing students enrolled in introductory management and entrepreneurship classes.”
