Calculating Final Curation Costs

When calculating total project curation costs, CAS, in consultation with the submitting firm, will assess the volume of curated materials and estimate final costs using the rates indicated above. Total volume of records will be calculated from the total number of inches after duplication (minimum total is 2 inches with the duplicated set of records). A 15% indirect cost will be applied to the total on the invoice.

Listed fees assume that collections are in a curation-ready state upon submission. CAS staff will inspect for compliance before a collection is formally accessioned. If significant issues are present, CAS staff will contact the submitting firm about resolving these. CAS can prepare collections for curation, or resolve outstanding issues with pending collections, with costs to be determined on a project-by-project basis.

Rates are subject to periodic change, and new rates will be posted on-line with the date of change. Please be sure to check our website before submitting a collection for curation.

Federal Curation

Federal curation fees are based on the estimated staff time needed to curate Federal collections in compliance with *36 CFR §79: Curation of Federally-Owned and Administered Collections*. Please contact CAS to receive information about our annual curation rate for Federal collections.
