Parking Services implemented a new gate system in the LBJ Student Center Parking Garage and the Edward Gary Street Parking Garage that recognizes license plates upon entry and departure.

The contract with DoubleMap for the university shuttle system was amended to include the purchase of updated GPS equipment and the upgrade of automatic passenger counters. This allows Transportation Services to certify the counts with the Federal Transportation Administration, thereby allowing our ridership to qualify for federal funding.

Facilities implemented a new key issuance and recovery process, updated the UPPS regarding keys, and added software (AiM key module) to support the change.

Transportation Services, in collaboration with the University Police Department, procured the TapRide app from DoubleMap, the current shuttle real-time passenger information system provider. TapRide is a new application for the campus that is being used by students, faculty, and staff to call for a security escort during night hours.

Facilities automated the Project Planning Form to gather information for the Capital Improvement Projects submittal to the System Office. The process also now includes soliciting project information from auxiliaries (e.g., housing, athletics, etc.).

Working with the Business Analysis and Solutions Department, the ID Services Department enhanced an existing Photo ID Upload tool to be used for our incoming New Students. This was especially timely as the New Student Orientation program was forced to go virtual thereby taking away the previous solution of ID Card Production face-to-face.
