Use the "Light" icon to turn on/off the camera light.

Use the "Power" icon to turn on the camera. There's no need to ever turn it off.

The LED turns blue when the camera is *on* and red when it is *off*.

Use the "Zoom In" and "Zoom Out" icon to see the image close up or farther away.

Use the "Auto Focus (AF)" icon to focus the camera. One push and it's done.

Use the "Brightness" and "Darken" icon to brighten or darken an image.

Use the "Rotate" icon to rotate an image 0°/180°. Tip: For a 90° adjustment, rotate the camera head.

Push the "Freeze" icon to pause/restart an image. Tip: The center LED will flash yellow when "Freeze" is enabled.

Use the "Rotate" icon to rotate an image 0°/180°. Tip: For a 90° adjustment, rotate the camera head.

The Microphone is located in this area and is hidden. It is readily available for use.

Getting Started with Zoom
Steps for First Use

1. Start/Join a meeting in Zoom

2. Select the up arrow next to the Start/Stop Video icon and choose “Video Settings.”

3. Set Camera to MX-P2.

4. Select “Enable HD” check box.

5. Deselect “Mirror my video” check box and close the “Video Settings” window.

6. Select the up arrow next to the Mute/Unmute icon to select the microphone for use.

   PC: Select “MX-P2”

   Mac: Select “Capture Inactive”

   Tip: It is recommended to stand 2-5 ft. from the camera/microphone when speaking.

7. The MX-P2 is now ready for use. Use the “Rotate” button on the camera as needed to switch between webcam and doc cam use.

*Zoom settings are unique to your account on a specific computer. These steps should be performed the first time you use a room but should be retained thereafter.
