Documentation Guidelines

Sources of information used for determining a disability and/or accommodation may include a student’s self-report, direct observation and interaction with the student, and/or documentation from qualified evaluators or professionals.

Student Self-Report

Students should complete the Online Student Application which provides students an opportunity to describe their disability and accommodations they are hoping to receive. Students may also consider providing an additional letter that further elaborates upon their experiences related to their disability, their strengths and functional limitations, barriers they have encountered, and/or previous accommodations (effective and ineffective).

Documentation from External Sources

Relevant information from external sources can help to substantiate the presence of a disability and the need for accommodations. This information should provide evidence of the functional limitations of the disability and their impact on the student’s life. Criteria for the source, scope, and content of documentation differ by disability type. Documentation may include assessments, reports, and/or letters from qualified health care providers, psychologists, or diagnosticians, and/or information from a previous school (e.g., 504 plan, IEP, or ARD documents). In order to ensure an objective assessment, the professional completing the evaluation must be an impartial individual who is not related to the student.
