I’ve spent the last several weeks taking in all the changes to our San Marcos campus. I walk along nearly empty sidewalks and buildings. The people I do see on the Quad or on the Mall shuffle away as they see me coming to keep the appropriate separation. We speak muffled greetings through our masks. I can no longer give or receive a smile in passing. Not a soul lays out in the grass, throws a frisbee, or plays in the sand volleyball courts at Sewell Park. Our new recreation fields sit idle – inviting green pastures yearning for a game of flag football, soccer, or a quidditch match. Normally jam-packed buses glide around town only sparsely populated. Who would have thought last fall just how different the world would be just one year later?

Despite all of this, I still feel the heartbeat of Bobcat Nation. I see it in the hundreds of hours of Teams and Zoom meetings we participate in where we strive in earnest to do what’s best for our students. I hear it...
DATES TO REMEMBER

October
Oct 2  •  International Day of Non-Violence
Oct 5  •  World Teachers’ Day
          •  Child Health Day
          •  World Habitat Day
Oct 12 •  Columbus Day
          •  Indigenous People’s Day
Oct 13 •  Navy Birthday
Oct 16 •  Boss’s Day
Oct 24 •  United Nations Day
Oct 31 •  Halloween

November
Nov 1  •  All Saints’ Day
          •  Daylight Saving Time Ends
Nov 2  •  All Souls’ Day
Nov 10 •  Marine Corps Birthday
Nov 11 •  Veterans Day
Nov 13 •  Friday the 13th
Nov 14 •  World Diabetes Day
Nov 26 •  Thanksgiving Break
Nov 26  •  Thanksgiving Day
Nov 29  •  First Sunday of Advent
Nov 30 •  Cyber Monday

December
Dec 1  •  Rosa Parks Day
Dec 3  •  World Day for Persons with Disabilities
Dec 5  •  International Volunteer Day
Dec 7  •  Pearl Harbor Remembrance Day
Dec 10 •  Human Rights Day
Dec 11 •  Chanukah/Hanukkah (first day)
Dec 11-12 •  Texas State Winter Break (Dec. 21 – Jan 1)
Dec 18 •  Ugly Christmas Sweater Day
Dec 21-Jan1 •  Holiday – Texas State
Dec 24 •  Christmas Eve
Dec 25 •  Christmas Day
Dec 26 •  Kwanzaa (first day)
Dec 31 •  New Year’s Eve

AND THE WINNERS ARE...

July 2020 FSS Quarterly Team - Facilities Commodity Procurement Team

Facilities Administration: Tom Shewan
Financial Services: Darryl Borgonah
Environmental, Health, Safety and Risk Management:
Wendy McCoy, Shea Cockrell, Colleen Cook, Lynn Lindsay, Katherine Beamer, Mackenzie Mitchell, Chad Thomas, Grant Davis, Elsie Romano, La Donna Tate, Diana Trelles, and James Frye

Facilities Procurement:
Jon Gaddis, Amy Thaxton, Joel Trevino, Daphne Helms, Ana Hicks, Laura Piercy, and Edie Harvey

Facilities Management: Lindsey Sinner

Facilities Operations:
Lisa Walker
Facilities Garage:
Bert Cole, Chris Aguirre, and Andy Kildau
Procurement and Strategic Sourcing:
Dan Alden, William Becker, and Lisa Leopold
Shared Research Operations:
Casey Smith
Materials Management and Logistics:
Frank Gonzalez, John Rayos, Monica Sanchez, Jennifer Mireles, Floyd Torres, Johnny Gonzales, Jose Duran, Carlos Chavarria, Doug Mallard, David Vasquez, Jorden Zuniga, Manuel Pantoja, Rick Selvera, Arturo Pineda, Clayton Williams, and Sandra Rodriguez

VPFSS BROWN BAG

Have an idea... a question... a concern? Eric Algoe will host virtual monthly Brown Bag sessions on the following dates:

Wednesday, Nov 11
Print & Mail Services, Copy Cats, ID Services
12:00 p.m. - 1:00 p.m.

Wednesday, Dec 9
Facilities Operations
12:00 p.m. - 1:00 p.m.
Facilities Planning, Design and Construction (FPDC) is responsible for managing the planning, budgeting, scheduling, programming, design and construction of all new and renovation projects related to Texas State University facilities in San Marcos and Round Rock.

Our goals are to provide professional project management services to the University for all facilities renovation, alteration and new construction, including project planning, budgeting, scheduling, programming, designing, estimating, bidding, procurement, construction, inspection, finishes, furnishings, and occupying services; to provide “Platinum Rule” customer service to all customers: Texas State students, faculty, staff, administration, and the San Marcos community; to successfully schedule and facilitate the implementation of the Campus Master Plan in a systematic and orderly manner to meet the goals and objectives of the plan; to provide and/or manage planning, design and construction services and standards for the University to comply with applicable codes, regulations, environmental requirements, and other standards for construction; to manage each project from inception to completion with integrity and professionalism to ensure the highest quality product with the greatest satisfaction to the Users; to develop a campus-wide project team attitude and involvement in each major construction project to foster acceptance and investment in the successful building of a premier campus and to perform University facility construction, modification and renovation services to further enhance the highest quality educational environment for Texas State Students, Faculty, Staff, Administration, and the Community.

FPDC is comprised of four vital groups.

**Capital Projects**

The Capital Projects group, led by our Interim Director, Larry Miller, is responsible for construction (new and renovation) projects which generally exceed $1,000,000 in scope and budget, employ the services of a design consultant (Architect or Engineer), require the approval of the Board of Regents, and depending on scope, approval of the Texas Higher Education Coordinating Board. Capital Projects consists of Architects, Project Managers, Construction Managers, a Construction Inspector, and employs the skills of our GIS (Geographic Information System) Specialist, and a CADD (Computer-Aided Design and Drafting) Specialist. The group works in teams to oversee, manage, supervise, and inspect each of our Capital projects, from feasibility to completion. Combined, Capital Projects has over 293 years of experience.

**Special Projects**

The Special Projects group, led by Associate Director, Don Compton, is responsible for most renovation and remodeling, and specialized new projects which generally are under $1,000,000 in scope and budget. This team employs the assistance of Architects and Engineers as needed. Various construction delivery methods are utilized, including Job Order Contracting (JOC). In any given year, Special Projects handles between 120 to 160 projects and manages from $10 million to $15 million in contracted work. Special Projects consists of an Assistant Director, specialized Construction Contract Administrators (CCA), and also employs the skills of our GIS and CADD Specialists. The CCAs work independently on their assigned projects from receipt of the Space Allocation and Furniture Request Forms to completion. Combined, Special Projects has over 197 years of experience.

**GIS/CAD Office**

Our GIS/CAD Office, led by GIS Specialist, Bob Stafford, provides CAD managing services for departments within the facilities operations and construction on campus. They also provide complete mapping and GIS for maintenance and construction tasks on university properties; rendering and artists’ concepts to assist in university planning, design, and construction projects; complete CAD files for architects and engineers for the purposes of construction and renovation to buildings and utilities on university properties; manage a complete library of architectural flat files and Operation & Maintenance information books for the entire university properties; as well as maintain and archive survey information for university properties. Combined, Bob and Jason have over 46 years of experience.

**Procurement**

The FPDC Procurement group, led by Liz Mendez, Associate Director, consists of two Construction Program Analysts, and two certified Buyer Ills. This team is responsible for all the accounting, budgeting, construction services, contracting, and purchases for both the Capital Construction and Special Projects teams. The Buyers facilitate the sourcing and contracting for the architects, contractors, furniture, unique equipment, and all other project needs. This is only a small sample of the tools in their toolbox and the services they provide. In an average year, this team generates close to (700) purchase orders with an approximate total value of $72 million. Over the past several years, the department has facilitated projects ranging from $1,200 to $120 million. Prior to Accounts Payable disbursing payment, the FPDC Analyst reviews and audits all construction-related invoices and pay

“During a birthday-gone-wrong, the plans my mother and I made were canceled. To mend the disappointment, my mother took me to a shopping mall food court to deal with two hangry thirteen-year-olds. Shortly after, we ran into a man dressed in a very large Pikachu costume. He was in town for a convention called A-Kon. My mother took me and my friend to check it out which was full of people who were dressed in costumes from just about anything you could imagine...anime, movies, tv-shows, video games. There was also a MASSIVE droid from Star Wars that just wandered around the convention hall. After I saw all that, I decided that it looked very cool, and I wanted to do the same thing. This encounter got me into the costuming and special effects makeup thing. I became more serious about it in middle school and by college, I was actively making my own costumes and doing intense special effects makeup looks.

My cheapest costume was probably a post-apocalyptic Mad Max-esque costume. Ninety percent of this costume was made from items I found at Goodwill for under five dollars. I also used some spray paint and deer bones. It looked really cool and it was very inexpensive. The most expensive costume I own is Aizawa, another character from My Hero Academia. I didn’t want to hand sew it, but I felt like just buying the pieces wasn’t enough. I did some research and bought military-grade items to build a costume that I thought would be accurate to what the character would have if he existed in real life.

I don’t really do contests, but I do like to go to conventions as often as I can. I do something called an in-character panel which involves dressing up as characters from a specific show. You are in front of an audience and they ask you questions that you then answer like you think the character would answer. It’s sort of like an improv show.

Finally, the most useful skill I’ve gained from this hobby is learning how to sew! I’ve fixed a lot of things for myself, my friends, and my coworkers with my sewing machine. I can however tell you that SFX makeup skills do not translate to real makeup skills. I have given myself third-degree burns, a 5 o’clock shadow, and scars across my entire face, but for the life of me I cannot do regular makeup; but I can say that I can create some interesting costumes and SFX makeup that I enjoy creating and am proud to wear.”
Thank you to all who defend the Constitution and laws of the United States of America against all enemies, foreign and domestic.
FSS DIVERSITY

Generation Z (ages 18-23) has come of age during a post-9-11 world, marked by some very consequential events in history—school shootings, ongoing wars, a pandemic, racial injustice protests, and an economic downturn. This generation (Gen Z) is referred to as digital natives, having little or no memory of a world without smartphones. And, they are the student population at Texas State University. Growing up while navigating these events strengthened their bonds in ways that are hard for older generations to understand or emulate. Similarly, more of them have an innate acceptance of racial and ethnic differences that surpasses previous generations.

As we write the latest chapter in the long fight for racial justice nationally and work toward greater inclusivity at TXST, Gen Z, through their actions, are likely a few steps ahead of the rest of us. Even Millennials, now all grown up and in the workforce, can learn from their successors who are more racially and ethnically diverse than any previous generation. Gen Z does not allow us to forget that our nation continues to be imperfect in the quest for inclusivity and equity. They celebrate different cultures, embrace diversity, and stand together to mobilize against racial injustice. They are also politically minded and politically active, and they are now starting to vote.

While the COVID-19 pandemic shows us how differently individuals can respond to a disaster or an emergency, it also sheds light on how uniting against a common threat, despite our differences, is the best way to succeed. Gen Z is uniting and continuing their activism despite the obstacles of COVID-19 by deploying their greatest strength to organize—technology.

Social distancing, masks, plexiglass, and other safeguards are less of a barrier for a generation that is more in sync through technology than any before them. They are persevering in their ongoing work to make positive change. Even as we are distanced, listening to their call to action during an unprecedented time in our country can create unity in purpose among the Bobcat Community to follow their lead.

Gen Z, although facing an uncertain future, is still inspiring us to work toward achieving a more just country. As we foster an inclusive environment at TXST, our role is clear—to help this generation find its voice and its power, to model respect for each other, to ensure safety as much as possible, and to lift up the awesome burden and joy of performing your civic duty.

SPOTLIGHT ON FACILITIES PLANNING, DESIGN AND CONSTRUCTION

...Continued from page 3

applications for contract compliance and accuracy. In addition, the Analyst completes a detailed expenditure and budget reconciliation for each of the larger construction projects on a monthly basis. During a one-on-one meeting each month, the Analyst and Project Manager review the financial condition of their assigned projects. Given the various funding sources linked to many of these projects, ongoing coordination with the Budget and General Accounting Offices is imperative. This team, as a whole, ensures construction budgets stay within those approved by the Board of Regents and/or those delegated to the President. Combined, our Procurement team has over 120 years of experience.

DID YOU KNOW???

A construction or renovation project on state property is handled differently than projects done in the private and business sectors. When government funds are used, there are far more checks, balances, and vetting processes that must be adhered to in order to ensure we are being good stewards of the funding provided.

BOBCAT CHATTER  What strange food combination do you really enjoy?

Val Gomez
Mail Clerk I
Print and Mail Services

"Shredded carrots and sliced oranges."

Madeline Davila-Adams
Director
Payroll and Tax Compliance

"Chocolate con queso – Serve hot chocolate over cubes of cheddar cheese and eat the melted cheese with a piece of fresh bread or saltine crackers."

Raymond Loriaux
Emergency Management Coordinator
University Police

"Fritessaus ("fries sauce") is a Dutch accompaniment to french fries, served popularly nationwide. It is similar to mayonnaise, but with at most 25% fat, is leaner and usually sweeter than mayonnaise."
in the mask-covered laughter coming from our dining and residence halls. I sense it from our staff who continue to do everything they can to provide service and support. Most importantly, I feel it from our faculty and students whose passion for teaching and learning is as strong as ever. As difficult as these times are for many in our community and around the world, I remain hopeful for our future.

These extra measures throughout the spring and summer and today, while challenging have proven to make a difference. Texas State, when compared to many institutions of higher education, is faring much better in dealing with COVID-19. We have weathered the first six months of the pandemic without being required to lay off employees or take enormous budget cuts that might cripple our ability to fulfill our mission. Although our enrollment is down by just one or two percent, that actually compares favorably with a great many colleges and universities around the country. We have successfully implemented scores of changes to the way we operate that are designed to mitigate the spread of COVID-19 and our employees have figured out flexible ways to work that limit their exposure to the virus.

COVID-19, as unprecedented a challenge as it is, may not even be our greatest challenge this academic year. That is because we are simultaneously facing one of the most contentious presidential elections in a lifetime, an economic downturn, and a wave of racial justice activism like which have not been seen in our country for 50 years. Each of these challenges is unique and stands alone, but they also all interact with one another, adding complexity and increasing the repercussions of mistakes.

All of these challenges deserve consistent work and open communication, and some will take much more than the others. The election will be intense, but it will come and go in November and will likely be in the rear-view mirror by the time we get to the spring semester. I expect COVID-19 to continue much the same as it is now for the lion’s share of this academic year since it will take significant time to distribute a vaccine even after it is fully approved. Contrasting those short-term challenges with the issues we are facing around racial justice, which have gone on for centuries, and the enormity of the challenge may feel like too much to bear.

I, however, choose to be hopeful. We have so many good people working hard, and working together, on these issues at Texas State. To be clear, no university or city will handle these challenges perfectly. We see examples of cities where the best intentions have gone awry on the nightly news on a regular basis. We should not expect perfection. Rather, we should demand progress. Through sustained attention, effort, and communication, we can continue to make our corner of the world a better place. Let’s face all these challenges, and anything else 2020 can throw at us, together. Even in the darkest and most difficult times, perhaps then more than ever, it’s a great time to be a Bobcat.

"The vote is the most powerful instrument ever devised by man for breaking down injustice and destroying the terrible walls which imprison men because they are different from other men.”
Lyndon B. Johnson
