

FY 2019 Budget Review Process Instructions

Purpose

These instructions show step-by-step details for reviewing reports and entering plan data in the SAP Business Warehouse during the Annual Budget Review process.

FY 2019 Budget Review Instructions

The primary purposes for reviewing budgets are to ensure accuracy and to reconcile salary lines.

The budget will be reviewed using the SAP Business Warehouse (BW). All Account Managers, Deans/Directors, and Vice Presidents will have access to the SAP Business Warehouse via workbooks and reports. The data in the Business Warehouse will come directly from SAP and will be used to build the final budget in SAP.

Access Dates to the BW System:

All Level – Report Review		April 9 – July 1
Dean Directors Update	Review Dates	April 23 – May 6
Vice President Update	Review Dates	May 7 – May 27

Caution: When the time frame for the appropriate level has ended, that level will be locked and no more data entry will be possible at that level. If further changes are required, data entry will have to be made at the next level.

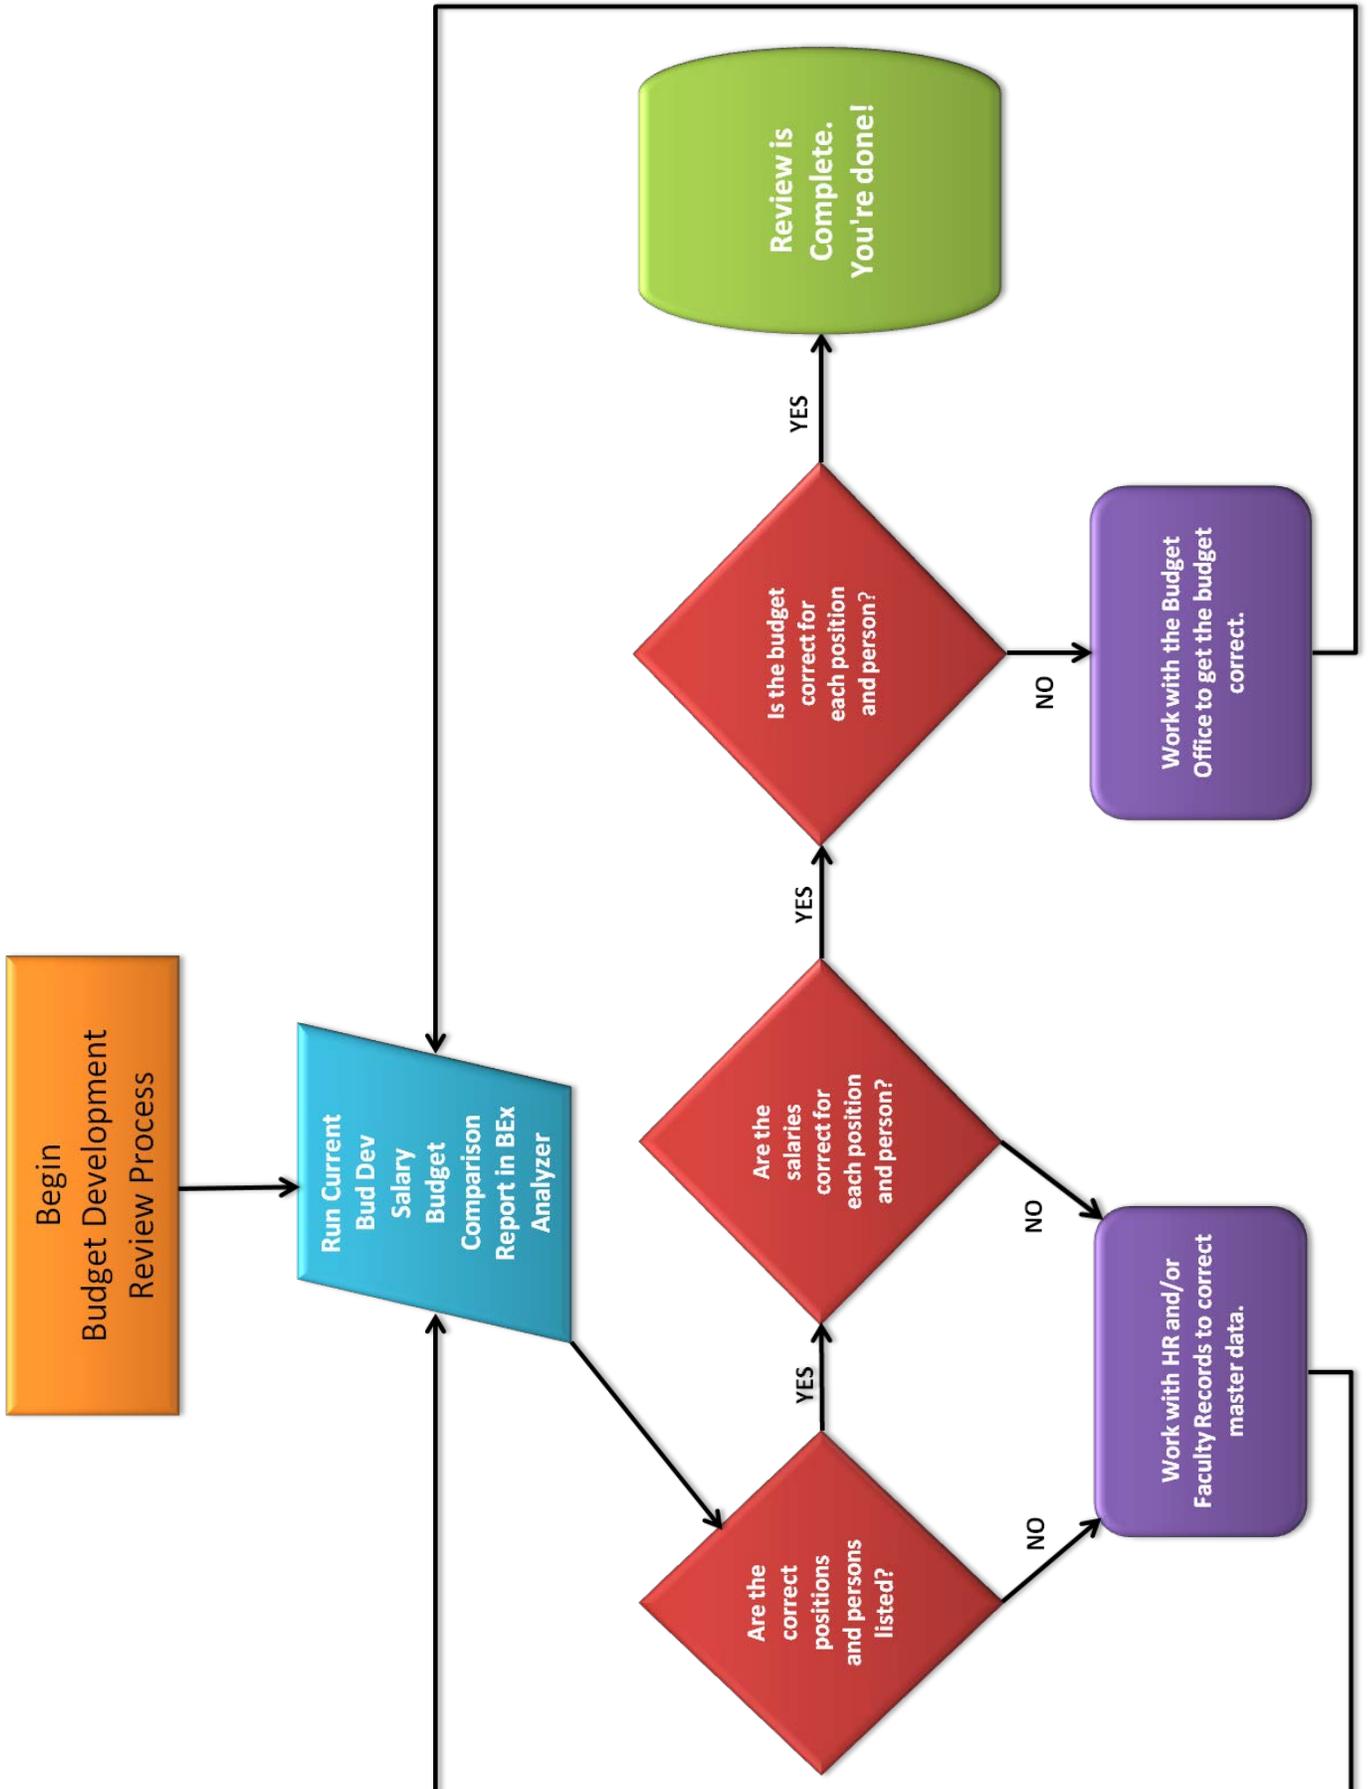

Key Concepts:

- Within SAP the salary detail is maintained in HR (Human Resources) and the budget detail is maintained in FM (Funds Management). These two will be referred to as HR and FM.
- There are nightly updates from SAP to the Budget Review system. This means that changes for building the FY19 Budget will occur in two ways:
 - FMBBs and PCRs will be processed in SAP and these changes will pick up nightly and update the reports and planning workbooks in the BW system.
 - Other budget changes will be made directly in the BW system and then “retracted” back into SAP for the FY 2019 budget.
- If the report shows an  icon in one of the columns there is a comment associated with that funds center. Comments are inserted during planning to define why a budget change was made. (Refer to [BEx Analyzer Instructions](#) for details on entering and viewing comments).

Overview of Process:

- Review your salaries and HR data using reports/queries. Managers are to verify all positions and salaries and make sure everything is correct. Any necessary changes can be handled in SAP via either PCR or FMBB. (See flowchart on next page of this document.)
 - Report: *Current Bud Dev Salary Budget Comparison*
- Review FM changes made during Budget Review using a report to see the current status for your FY18 budget before you begin making your entries.
 - Report: *Current Budget Development Report*
- Plan for FY19 using planning workbooks. Enter any FM changes to be made and save data.
 - Workbook: *Dean/Director FM/HR Plan*
 - Workbook: *VP FM/HR Plan*
- Continue to review changes made to your accounts throughout the process using the *Current Budget Review Report* to follow the progress of your FY19 Budget and verify your own data entry.
- SAP will continue to update the Budget Review system until June 20th, at which point the Budget Office will reconcile the final budget.

Flowchart of Salary Budget Review Process

Overview of Reports and Workbooks:

Reports:

- **Current Budget Development Report**
 - This report contains the total dollar amount by commitment item and position currently in the budget as well as changes made at the various levels. One column per level for changes.
 - This will contain all commitment items: salary and operating.
 - This is used to view changes made in the Budget Review system by each level and can be used throughout the entire process.
 - Changes made in SAP will be picked up in the BW system nightly and will update (change) the Current Budget column and New Proposed Budget where appropriate.

- **Current Bud Dev Salary Budget Comparison Report**
 - This spreadsheet contains the total dollar amount currently in the budget (FM or Funds Management) for salaries and the detail by position and/or individual for the personnel currently in the system (HR or Human Resources.)
 - This will only contain salary commitment items.
 - This report is used to verify position and salary detail.
 - HR Changes made in SAP will be picked up in the BW system nightly and will update (change) the Annual Salary cost.
 - FM Changes made in SAP will be picked up in the BW system nightly and will update (change) the Current and New Proposed Budget.

Step-by-Step Instructions:

Note: These instructions discuss the order in which to run reports, how to analyze the reports, and how to enter your plan data in the BW system. You will need to refer to the BEx Analyzer instructions for information on how to open reports and workbooks and the basic functionality of the BEx Analyzer tool. So, use the two sets of instructions together.

Step 1:

Verify what changes, if any, have been made to your budget in the BW system:

Report: Current Budget Review

Overall Result											\$ 415,048.93

How to read this report:

- The data listed in the spreadsheet is in order by funds center, fund, commitment item, and position.
- **Current Budget:** equals the FY16 original budget +/- any permanent budget changes. This column will update nightly throughout the Budget Review process to reflect any permanent changes occurring in SAP.
- **Account Manager Plan, Dean/Director Plan, VP Plan, Budget Office Plan, Budget Recon, and Final Budget** columns represent the changes made at each of those levels in the BW system during the appropriate time frames.
- **New Proposed Budget:** is the total of all columns added together and represents the new FY19 budget that will be “retracted/loaded” back into SAP at the end of the process.
- Review comments, if any, to see why changes have been made to the budget.

1. **Verify the New Proposed Budget:**

- To confirm the budget total, run report [FMEDDW – Display Budget Entry Documents](#) (use variant “2019 BUD DEV”) and review Original Budget amount for FY 2019 +/- all *permanent* budget transactions that occurred. Then add any budget changes that have been made in the BW system. This total should match the New Proposed Budget column.
 - Refer to: FMEDDW instructions on how to display budget entry docs in SAP.
 - Refer to: Current Budget Review Changes Report (described above) to get BW changes.
- Please contact the Budget Office at 5-2376 with any questions regarding the budget or any transactions changing the budget total for the account.

2. **Confirm Annual Salary Cost:**

- To confirm the Annual Salary Cost, review the individual people and positions listed. Confirm that all the people listed are filling current positions with the correct cost distribution, salary amount, and FTE.
- Use the report [PA20 – Display HR Master Data](#) to confirm detail for the individual people.
- Use report [PO13D – Display Position](#) to display and confirm positions.
- The report [PPOSE – Display Organization Structure](#) can be used to display organizational units, positions, jobs, and persons.
- Use report [ZPSBRPT – Position and Salary Budget](#) to review HR salary data. Refer to Current Adjusted Salary column.
- Questions regarding the PA20 Master Data and PO13D position data can be addressed by Cindy Waggoner in Faculty Records for faculty (at 5-8378) and by Human Resources for staff (at 5-2557).

Caution: If HR Master Data is incorrect for either people or positions then a PCR must be processed or the position must be updated. When these changes have been entered in SAP, they will be reflected in your BW report after the nightly update runs.

3. **Review Your Result line:**

- Result equals zero and all the detail is correct: indicates you are properly budgeted for that salary commitment item. No action required for FM budget.
- Result is a **positive amount** and all the detail is correct:
 - Move the additional budget to the new Group Item via an FMBB in SAP to bring the positions into balance.
 - ***Note:*** *You will need to analyze your current fiscal year’s situation for this position. You may need to do a two-part FMBB with the annualized permanent transaction putting the excess in the group item and then adjusting with a temporary transaction to realign the current fiscal year.*
 - 670198 Staff Group Item
 - 670093 Faculty Adjunct Group item
 - 670094 Grad Student Group Item
- Result is a **negative amount** and all the detail is correct:

- If the FM budget is short and you are *also* under-funded in FY18, then process a Permanent FMBB in SAP to correct the deficit. This will correct both FY18 and FY18 budgets. You will see the change in the BW system reports the day after your FMBB posts to SAP and the BW system goes through the nightly update.
- If the FM budget is short and you are *not* underfunded for FY18, then make the budget adjustment in the BW system through your planning workbook (see directions in next section).

Step 3:

Planning FY 2019 FM budgets in the BW System

Workbooks:

- Account Manager FM/HR Plan
- Dean/Director FM/HR Plan
- Vice President FM/HR Plan

- Workbooks are used to enter plan data into the BW system—FM changes only.

How to read this workbook:

- The data listed in the spreadsheet is in order by fund, funds center, commitment item, and position.
- **Current Budget:** equals the FY18 original budget +/- and permanent budget changes. This column will update nightly throughout the Budget Review process to reflect any permanent changes occurring in SAP.

- **Account Manager Plan:** is the active planning column in this spreadsheet. Note the blue rectangles outlining the cells in this column. This indicates the cells are active and ready for data entry (your changes).

Note: depending upon which workbook you have access to this screen will look somewhat different. The Account Manager workbook only has the Account Manager column and it is active for changes. The Dean/Director workbook has both the Account Manager column and the Dean/Director column—and the Dean/Director Plan column is active for changes. The VP workbook has all three columns with the VP column being the active column for changes.

- **New Proposed Budget:** is the total of all columns added together and represents the new FY19 budget *to date*. This total could change due to entries made in SAP and/or at higher levels as the Budget Review process continues.
- Review comments, if any, to see why changes were made to the budget.

Making changes in your workbook:

Caution: As you are working in your workbook, **CALCULATE** and **SAVE** often. The system will boot you out and you will lose all your changes if you do not save within 2 hours of opening your planning workbook.

Moving funds between commitment items:

- Enter the amount of the change in the planning column and hit the **CALCULATE** button:

In this example, we moved \$500 out of Travel and into M&O. Notice the new totals under New Proposed Budget.

Entering comments:

- You should include comments for *all* changes made.

- Please follow the naming convention shown here:
Name: *Fiscal Year Funds Center Budget Review Level* (example: **2019 1411000000 AM**)
Full naming conventions for all levels are outlined at the end of this document.
- Description: Leave the description box blank.
- Text: Include in the text of your comment a description and reason for the budget change, including the fund number as well as the funds center if moving between funds centers.
- You will enter only one comment per funds center, although that comment may address several changes.
 - In the example above you would have created a comment, in which you would explain the \$500 move. If you were to make additional changes to this funds center, you would need to reopen the comment and edit it, adding explanations for all other changes you made.
- Refer to the BEx Analyzer instructions for information on how to enter, edit, view, and save comments.

Entering a new costing line:

- To enter a totally new line, use the blank data-entry row at the bottom of the workbook and hit CALCULATE.
- You can only do this one row at a time. As your new line is added the program makes another empty row available.

2000011008	Des Method	1320100001	Health Psychology	671000	Travel	\$ 3,000.00		-\$ 500.00	\$ 2,500.00

Overall Result						\$ 148,083.27		\$ 0.00	\$ 148,083.27

And a new empty row is created.

Making changes to your changes:

- Oops—you goofed up. You didn't really mean to move only \$500, you wanted to move \$1000 from Travel to M&O.
- Go back into your workbook and simply type over your previous entries. The system replaces old entries with new data. This is true even if you have saved your data.
- Example: Change the -\$500.00 dollar entry to -\$1000.00 and the \$500.00 entry to \$1000.00.

Hit CALCULATE and see that the totals under New Proposed Budget have changed:

Overall Result						\$ 148,083.27		\$ 0.00	\$ 148,083.27

Note: When entering a change for a budget line item that already has plan data in it you need to determine what your net or whole-dollar change should be. In the example above our goal was to have a total change of \$1,000. So, we replaced the \$500 entries with the \$1,000 entries to get the net result of a \$2,000 budget in Travel.

Funding Rules:

- Changes should balance. If you decrease a line item by \$500 you must increase another by \$500.
- To make changes to an income-generating account, the revenue and expense budgets would both need to be changed. The total revenue budget should equal the total expense budget. If the revenue is increased, you must also increase the expense. If the revenue is decreased, decrease the expense, too.
- Review your fund balances. You must be in balance *by fund*.
 - The exception to this rule is Method of Finance funds. You can balance *between* those funds. Use the variable “Method Funds for Budget Planning” to pull in only Method funds for your planning. This will ensure you don’t get out of balance.

Correctly balanced:

Fund		Funds Center		Commit Item		Current Budget	Account Manager Plan	Dean Director Plan	New Proposed Budget
1000050008	Op Support	1320100001	Health Psychology	670080	Faculty Salaries	\$ 48,346.83			\$ 48,346.83
