Overview

The following information defines the expense types in SAP Concur used to create Travel Requests and Expense Reports. This information is useful in determining which types to use for anticipated trip expenses (Travel Request) and the actual expenses incurred (Expense Report).

Travel Request Expense Types

**Group Lodging (Employee Travelers Only)**
This expense type is for group travel when multiple rooms will be necessary. Enter the number of rooms needed and the amount will be calculated according to the destination city’s lodging per diem, multiplied by the number of rooms once you click save. You may enter a comment to provide further information for the approvers.

**Lodging**
The dates of stay and destination city should auto populate from the request header. Lodging per diems will automatically calculate for overnight trips according to the destination city once saved. Multiple stops will be entered separately by selecting Lodging Per Diem again and entering the corresponding information in the fields. You may enter a comment to provide further information for the approvers.
**Lodging Tax**
Enter the estimated amount of hotel taxes. Best practice is to estimate 10% of the room rate for in-state taxes and 20% of the room rate for out-of-state taxes. You may enter a description or comment to provide further information for the approvers.
