

OER Course Development Grant Application Evaluation Form

Proposal Scoring

Max. Points

Actual Points

Project design

35

- The project is well defined and grounded in principles of effective instructional design.
- Planned learning outcomes and plans for assessments of learning are well-aligned.
- The project identifies how OER supports student mastery of learning.
- The project can be completed within the grant period.
- The proposed project is realistic and appropriate to the goals identified by the applicant.
- If materials are identified, the project description identifies the OER licensing of the materials.
- The proposed activities and strategies are appropriate and are described in sufficient detail.
- The project plan incorporates collaboration with University Libraries and instructional design support through the Office of Distance and Extended Learning.
- The project describes the course, how often the course is typically offered, and projected course enrollment.
- The project description identifies the current learning materials and the estimated savings to students if the project is developed.
- The project has support from the college/department/school.
- Project activities would likely continue after the grant period ends.

Project goals

25

- Project goals align with the overall goals of the OER grant program to develop or implement courses that use only open educational resources (OER).
- If identified, the course materials proposed are of sufficient quality to enhance course curricula, including student learning outcomes/objectives aligned to the OER as well as to assessments.
- The course materials are provided to the student at no cost, other than the cost of printing.

Evaluation and expected outcomes**40**

- The proposed project evaluation for determining the success of the project is described in sufficient detail and includes relevant information/data to be collected.
- The expected outcomes are achievable using the resources and plans the applicant submits.
- The expected outcomes would make a significant impact on reducing the cost of educational resources in the course(s).
- There are sufficient staffing and resources to ensure that project evaluation information/data will be properly collected and reported.
- The course has appropriate approvals to be offered at least one time via Extension within a year of the beginning of the grant period.
