

Criminal Justice 7321
Linear Regression for Criminal Justice Research
Texas State University
Fall 2013
Dr. Vásquez

Description and Objectives

“Instruction on the use of advanced linear modeling techniques in criminal justice research is addressed. After completing this course, students should be able to evaluate quantitative research articles in the major criminal justice journals and be prepared to complete a major quantitative research project of their own.”

This course provides an introduction to multivariate regression analysis. Topics include estimation, bivariate and multivariate regression models, model assumptions and diagnostics, and statistical interactions. While these topics will receive theoretical treatment, this is not a mathematical statistics or calculus-based course. The objective of the course concerns the application of the techniques and the interpretation of estimates generated with statistical software. However, this doctoral-level course is for students who actually intend to engage in quantitative data analysis for research purposes.

The course assumes students have the understanding of statistics provided by CJ 5325 or equivalent.

Class Meeting Time and Place

This class meets Wednesdays from 6:30PM-9:20PM in Hines Academic Center room 203.

Contact Information, Office Hours, and Email Message Policy

Professor Bob Edward Vásquez
Hines Academic Center, 109
Monday 2:00PM-3:00PM and by appointment.
Phone: (512) 245-8460
E-mail: Bob.Vasquez@txstate.edu

Students with appointments are given priority over “walk-ins,” phone calls, and email messages, so try to set up an appointment with me. Email messages should contain a greeting, a body, and a closing. Send professional email messages if you expect a response. I do not respond to incomplete email messages or messages that do not have sentence structure.

Attendance Policy

Do not miss class. Attendance is required in this course, and tardiness irritates me and disrupts the class. Absences will be disastrous for your progress and grade. It is in your personal interest to attend class. Statistical knowledge builds on itself, and my lectures will assume knowledge and understanding of previous lectures. If you get behind, you will find it exceedingly difficult to catch up.

Attendance Policy (continued)

Students should be mentally present too, a reason why there is no use of mobile phones and other such devices or distractions during class. Students should expect to take extensive notes during lecture.

*** I do not provide my lecture notes to students. I do not provide make-up lectures for absent students. I do not allow any audio or visual recordings of my lectures.*

Text and Materials

The following textbooks are required and should be available at the university bookstore. Other readings will be announced in class. You will also need a three-ringed hard-covered binder, plenty of paper, a writing instrument, and a scientific calculator. *Mobile phone calculators are not sufficient.* A graphing calculator is not needed, however. Bring all materials to every class.

Kutner, M. H., Nachtsheim, C. J., & Neter, J. (2004). *Applied linear regression models* (4th ed.). (ISBN-13: 9780073014661)

Jaccard, J. J., & Turrisi, R. (2003). *Interaction effects in multiple regression* (2nd ed.). (ISBN-10: 0761927425)

Exams, Grading, and Late Work

Your final grade will be based on your performance on four equal-weight exams given over the span of the semester. Exams are take-home assignments due *approximately* one week after they are assigned. An additional homework (CITI Training) assignment is part of the Exam I assignment.

The grading weights and dates are:

Exam I	= 25%	Due	September 25, 2013
Exam II	= 25%	Due	October 30, 2013
Exam III	= 25%	Due	November 20, 2013
Exam IV	= 25%	Due	December 11, 2013

Assignments are due at the beginning of class. Late work is not accepted. If a student's assignment is not in my hands on or before the time it is due, *the student earns a grade of zero percent on the assignment.*

Students with Special Needs

If you are a student with a disability who will require an accommodation(s) to participate in this course, please contact me as soon as possible. You will be asked to provide documentation from the Office of Disability Services. Failure to contact me in a timely manner may delay your accommodations.

Academic Dishonesty

It is expected that students do their own work in my class. This is a University-wide expectation, and academic penalties exist for violating the Honor Code Policy, which is provided below.

Texas State University-San Marcos Honor Code

As members of a community dedicated to learning, inquiry, and creation, the students, faculty, and administration of our University live by the principles in this Honor Code. These principles require all members of this community to be conscientious, respectful, and honest.

WE ARE CONSCIENTIOUS. We complete our work on time and make every effort to do it right. We come to class and meetings prepared and are willing to demonstrate it. We hold ourselves to doing what is required, embrace rigor, and shun mediocrity, special requests, and excuses.

WE ARE RESPECTFUL. We act civilly toward one another, and we cooperate with each other. We will strive to create an environment in which people respect and listen to one another, speaking when appropriate, and permitting other people to participate and express their views.

WE ARE HONEST. We do our own work and are honest with one another in all matters. We understand how various acts of dishonesty, like plagiarizing, falsifying data, and giving or receiving assistance to which one is not entitled, conflict as much with academic achievement as with the values of honesty and integrity.

THE PLEDGE FOR STUDENTS

Students at our University recognize that, to insure honest conduct, more is needed than an expectation of academic honesty, and we therefore adopt the practice of affixing the following pledge of honesty to the work we submit for evaluation:

I pledge to uphold the principles of honesty and responsibility at our University.

THE PLEDGE FOR FACULTY AND ADMINISTRATION

Faculty at our University recognize that the students have rights when accused of academic dishonesty and will inform the accused of their rights of appeal laid out in the student handbook and inform them of the process that will take place.

I recognize students' rights and pledge to uphold the principles of honesty and responsibility at our University.

ADDRESSING ACTS OF DISHONESTY

Students accused of dishonest conduct may have their cases heard by the faculty member. The student may also appeal the faculty member's decision to the Honor Code Council. Students and faculty will have the option of having an advocate present to insure their rights. Possible actions that may be taken range from exoneration to expulsion.
