

CJ 7322 – Advanced Research for Planning and Evaluation

Hines Academic Center Basement Seminar Room

Section 251 meets Mondays 6.30-9.20pm

Spring 2018

Instructor: Lucia Summers
Email: lsummers@txstate.edu
Office: Hines Academic Center Room 124
Office Hours: Monday 3.45-4.45pm, Wednesday 6.30-7.30pm, or by appointment

COURSE DESCRIPTION

An introduction to evaluation and research design methodologies, assessment techniques including modeling and case studies, agency management issues, and on-going policy implications. Course gives students an understanding of the principles and techniques commonly used to evaluate the effectiveness and efficiency of criminal justice interventions.

LEARNING OUTCOMES

By the end of this course you should be able to demonstrate (all at the doctorate level):

1. an advanced understanding of evaluation research; and
2. good critical evaluation, synthesizing, and written communication skills.

The goals above can be further broken down as follows:

- 1.1 Critically appraise evaluation research studies.
- 1.2 Identify original and appropriate evaluation research questions.
- 1.3 Select and justify methodologies of investigation appropriate to particular evaluation research questions, the nature of the topic area, and the resources available.
- 1.4 Identify ethical issues as they relate to evaluation research, including IRB processes.
- 1.5 Define field-specific terms.
- 1.6 Describe the procedures, strengths and limitations of various evaluation research designs.
- 2.1 Critically evaluate and synthesize a specific body of literature.
- 2.2 Demonstrate a good standard of academic writing.

This is a *doctoral-level specialist* methods course that requires *general* knowledge about research methods *at the doctoral level*. An assumption will be made that you are familiar with the concepts covered in CJ 7320 Quantitative Research Methods; if you have not taken this course yet, you are strongly encouraged to take CJ 7320 before you take this course. If you took CJ 7320 some time back, you are strongly encouraged to review the material from CJ 7320, so as not to hinder your progress when taking this course. In particular, you should be familiar with the material covered in Shadish et al.'s (2002) text *Experimental and quasi-experimental designs for generalized causal inference*. If you do not have a copy of this book, you should purchase one.

You should also be already familiar with the information provided in the source listed below:

- Fratello, J., Kapur, T. D., & Chasan, A. (2013). *Measuring success: A guide to becoming an evidence-based practice*. New York: Vera Institute of Justice.

Each session will have a designated reading list. However, rather than going through the main concepts as covered in the textbooks, class time will be mainly used to review published research (related to the topic being discussed) and carrying out practical exercises. You are expected to have learned the material from the relevant designated readings and to actively engage in the in-class exercises and discussions.

ASSESSMENT

As part of this course, you will need to sit two exams, submit one research proposal, and actively participate in class (see below). The details on these forms of assessment are provided in Table 1. Detailed assessment criteria – in the form of assessment rubrics – will be provided separately for the research proposal. There will be NO optional assignments for extra credit.

Table 1. Overview of course assessment.

		Class part.	Exams	Research prop.
Deadline		N/A	Mar 5 / Apr 30	Apr 19
Learning outcomes assessed		10%	20% / 25%	45%
1.1	Critically appraise evaluation studies.	✓	✓	
1.2	Identify evaluation research questions.			✓
1.3	Justify methods appropriately.	✓	✓	✓
1.4	Identify ethical issues for evaluation.	✓	✓	✓
1.5	Define evaluation terms.	✓	✓	✓
1.6	Describe procedures, pros and cons of designs.	✓	✓	✓
2.1	Critically evaluate and synthesize the literature.			✓
2.2	Good academic writing.			✓

Class Participation

This is a seminar-style class and its success depends on your attending class (and remaining there for the duration), adequately preparing for class (i.e., by learning – not just reading! – the designated materials and completing any other tasks set by the instructor), and actively participating – and leading discussions as required – while in class. There will be exercises introduced in class that require no additional preparatory work, while others will require this (e.g., reviewing peer’s work in preparation for peer assessment sessions).

Class participation will contribute 10% towards your final course grade.

Research Proposal

You will need to write ONE research proposal, which is due on April 20.

Expectations regarding the content of your proposal will be discussed throughout the semester, and peer assessment sessions will be scheduled for you to receive informal feedback and learn from each other. Please note that the instructor will NOT be providing formal feedback on these drafts, but will rather answer specific questions during class time. If you want to discuss your drafts in more detail, you should make an appointment to see the instructor during office hours.

Research proposal topics (including specific research questions to be answered by the proposed research) will need to be proposed no later than January 26 and officially approved by the instructor no later than February 9. If you fail to meet EITHER of these two deadlines, 10 percentage points will be deducted from your research proposal’s final grade.

Your research proposal should be submitted by April 20 at 10am through Turnitin.

Any proposals uploaded later than the date and time specified will receive a ZERO grade. Extensions will only be granted under exceptional circumstances (see above) and evidence of these will be required.

Your research proposal will contribute 45% to your final grade.

You will receive a grade and formal feedback for your proposal within 2-3 weeks of the submission deadline.

Proposals that are indicative of plagiarism (or any other form of violation of the Honor Code) will be investigated as per procedure, and penalties applied if appropriate (see [Texas State University’s Honor Code](#) and University related Policies section below).

HOW TO USE TURNITIN

If you don't have a Turnitin account yet, you will need to create one. To do this:

1. Go to www.turnitin.com.
2. Click on **Create Account** at the top of the page.
3. Click on **Student**.
4. Fill in all the fields. Enter the Class ID and class enrollment password as provided by your instructor (see below).
5. You should now see this class listed under the 'All Classes' tab.
6. Click on the class title to access the assignments list.
7. Click on the Submit button next to the relevant assignment to upload your essay (remember to select the 'Upload single file' from the drop-down menu).

If you already have a Turnitin account:

1. Log into www.turnitin.com.
2. Click on the "enroll in a Class' tab.
3. Enter the Class ID and class enrollment password as provided by your instructor (see below).
4. You should now see this class listed under the 'All Classes' tab.
5. Click on the class title to access the assignments list.
6. Click on the Submit button next to the relevant assignment to upload your essay (remember to select the 'Upload single file' from the drop-down menu).

The Class ID and enrollment key for this course are:

Class ID: 17054270
Class enrollment key: CJ7322LS

More details can be found on <http://www.its.txstate.edu/departments/etc/turnitin.html>.

Exams

There will be TWO exams, on Monday March 5, and on Monday April 30. The first exam will test your knowledge on the material covered up until the date of the exam; the second exam will be a comprehensive exam and may therefore include questions to any of the material covered throughout the semester. Both will take place in a computer lab (i.e., you will type in, rather than hand-write your answers; room number Hines 101). The exams will be open-book; however, access to the internet will be strictly prohibited (i.e., you can review your materials in both hard copy and electronic form but NOT online materials); any students who are caught accessing the internet during an exam will be the subject of an Honor Code violation investigation.

The format and content of the exams will be discussed closer to the time of the examinations. You will have TWO AND A HALF HOURS to complete each exam.

Late arrivals and no-shows on the date of your exams will automatically receive a ZERO grade and you will NOT be allowed a retake. This penalty may be waived but only when exceptional circumstances can be demonstrated. Exceptional circumstances include sudden illness or an accident. Delays in getting to campus due to heavy traffic, an alarm not going off and the like do NOT constitute exceptional circumstances. If you want to request a penalty waiver, you should email the instructor outlining the extenuating circumstances that apply in your case at your earliest opportunity, and provide her with evidence of such circumstances as requested.

You will receive a grade and formal feedback for your exams within two weeks of the exam date.

Your first exam will contribute 20% to your final grade, and your second (final) exam 25%.

READING REQUIREMENTS

The main textbooks for this course are:

Rossi, P. H.; Lipsey, M. W. & Freeman, H. E. (2004). *Evaluation: A systematic approach*, 7th ed. Thousand Oaks, CA: Sage.

ISBN-13: 978-0-7619-0894-4

Pawson, R. & Tilley, N. (1997). *Realistic evaluation*. London: Sage.

ISBN-13: 978-0761950097

Additional readings are listed on the Class Schedule (see below). You are also required to identify and read additional material relating to the topic that you choose for your evaluation research proposal; evidence of wider reading will be one of the assessment criteria.

CLASS SCHEDULE

Wk	Date	Class topic	To be completed BEFORE class (Additional readings may be assigned by instructor)	Important dates
1	Jan 15	NO CLASS MLK Holiday		
2	Jan 22	Introduction to the course Introduction to evaluation research Research proposal topics (and rationales)	<ul style="list-style-type: none"> ▪ Fratello, J., Kapur, T. D., & Chasan, A. COURSE RELATED POLICIES

Attendance and Participation

Students will be required to sign a register at the start of each class. Attendance and punctuality are required. Please do not come in late or leave early as this can be distracting to others.

Technology / Electronic Devices

The use of certain electronic devices is allowed during class, as long as they are being used towards the aims of the course. In other words, you are allowed to use your laptop or iPad to take or access notes, or to perform certain class exercises; you are not permitted to use electronic devices for non-educational purposes (e.g., checking your text messages, playing solitaire). Penalties may be applied if you are caught engaging in this type of behavior, as doing so distracts others. The use of digital recorders may be allowed by arrangement. Students with disabilities will also be able to use specialized equipment by arrangement (more details on this later).

Office Hours

Office hours are available for you to address questions, concerns, and any issues you may wish to discuss about the course. Please do not hesitate to take advantage of this time, especially if you are experiencing difficulties with the course. The sooner we address a problem, the more likely we are to resolve it favorably. If you are unable to meet during the office hours for any reason, please contact me to arrange an appointment outside these hours.

During office hours, I will be in my office and happy to welcome drop-ins, but students who have previously made an appointment will have priority. Outside office hours, I will only see students by prior arrangement.

There is a 24-hour cancellation policy for all appointments. If you make an appointment and fail to turn up, or if you cancel with less than 24 hours' notice for no legitimate reason, this will be recorded. After two such incidences, you will be unable to make any further appointments. You will, however, still be able to drop in during office hours.

If you have any questions about the content or administration of the course, and this can be addressed through email, please consider posting a message in one of the course forums, so that other students can benefit from any resulting discussion.

Contact

Email is the best way to get in touch with either of us as we are not always on campus or available by phone. As a general rule, we will respond to emails within 1-2 business days; if for whatever reason we have no access to email for more than a couple of days, we will let you know in advance.

If you have any questions about the content or administration of the course, and this can be addressed through email, please consider posting a message through TRACS, so that other students can benefit from any resulting discussion.

I often email students with important information, or make announcements through TRACS, which automatically get sent to your TX State email account. It is your responsibility to ensure you regularly check your TX State email account.

UNIVERSITY RELATED POLICIES

Academic Honesty Policy

Submission of any work for a grade for which unauthorized help has been received is termed academic dishonesty and may be grounds for a failing grade in the course. "Unauthorized" is a term used here to designate stealing, copying (with or without permission), or collaboration with other individuals. Students are strongly encouraged to refer to the Texas State student handbook for policies related to academic dishonesty. These policies may be found at <http://www.dos.txstate.edu/handbook/rules.html> .

Honor Code

(<http://www.txstate.edu/effective/upps/upps - 07- 10 - 01.html> under attachment I)

As members of a community dedicated to learning, inquiry, and creation, the students, faculty, and administration of our university live by the principles in this Honor Code. These principles require all members of this community to be conscientious, respectful, and honest.

WE ARE CONSCIENTIOUS. We complete our work on time and make every effort to do it right. We come to class and meetings prepared and are willing to demonstrate it. We hold ourselves to doing what is required, embrace rigor, and shun mediocrity, special requests, and excuses.

WE ARE RESPECTFUL. We act civilly toward one another and we cooperate with each other. We will strive to create an environment in which people respect and listen to one another, speaking when appropriate, and permitting other people to participate and express their views.

WE ARE HONEST. We do our own work and are honest with one another in all matters. We understand how various acts of dishonesty, like plagiarizing, falsifying data, and giving or receiving assistance to which one is not entitled, conflict as much with academic achievement as with the values of honesty and integrity.

THE PLEDGE FOR STUDENTS. Students at our university recognize that, to insure honest conduct, more is needed than an expectation of academic honesty, and we therefore adopt the practice of affixing the following pledge of honesty to the work we submit for evaluation:

I pledge to uphold the principles of honesty and responsibility at our university.

THE PLEDGE FOR FACULTY AND ADMINISTRATION. Faculty at our university recognize that the students have rights when accused of academic dishonesty and will inform the accused of their rights of appeal laid out in the student handbook and inform them of the process that will take place:

I recognize students' rights and pledge to uphold the principles of honesty and responsibility at our university.

ADDRESSING ACTS OF DISHONESTY. Students accused of dishonest conduct may have their cases heard by the faculty member. The student may also appeal the faculty member's decision to the Honor Code Council. Students and faculty will have the option of having an advocate present to insure their rights. Possible actions that may be taken range from exoneration to expulsion.

Campus Carry

As of August 1, 2016, individuals with a concealed handgun license (CHL) are permitted to conceal-carry while on campus (www.txstate.edu/campuscarry). In the interest of safety, the instructor would prefer it if students did NOT conceal-carry during class or while visiting her office; however, it is the students' right to conceal-carry if they wish to do so. Having said this, please note any instances where a CHL holder intentionally or knowingly displays their firearm in plain view of the instructor will be referred to the Texas State University Police Department, as this constitutes a Class A misdemeanor.

Students with Disabilities

Students with disabilities may require accommodations to participate in the course. They must contact the instructor within the first two weeks of the semester. They will be asked to provide documentation from the Office of Disability Services (ODS) at that time. Failure to contact the instructor in a timely manner will delay any accommodations they may be seeking. Ongoing care by a physician does not automatically qualify you as an ODS special needs student. Students are required to file paperwork for accommodations with ODS each semester. Accommodations granted one semester do not automatically carry forward to the next.

This syllabus is tentative and may change due to unforeseen circumstances. The best way to stay informed is to check your TX State email, the TRACS site for this class, and to attend class. If there are any changes to the syllabus, the instructor will notify you in class and upload an updated copy to TRACS. Please note that losing your syllabus does not constitute an excuse for missing assignments or noncompliance with course policies.
