SECTION 1 – GENERAL INFORMATION & REQUIREMENTS

1.1 GENERAL INFORMATION: The Texas State University System (“Owner”) on behalf of Lamar University are soliciting Statements of Qualifications and Proposals (“RFQ/P”) for selection of a Construction Manager-at-Risk firm for the New Science and Technology Building (“Project”), on the University’s campus in Beaumont, Texas. This solicitation sets forth the terms, conditions, and requirements for prospective Construction Manager-at-Risk entities to be considered for this work. (Prospective Construction Manager-at-Risk entities submitting their qualifications and proposals in response to this solicitation are called “Respondents”). The Owner is requiring that Statements of Qualifications, Proposals and HUB Commitment Letter be submitted at the same time, but submitted in separate, sealed packages.

1.1.1 The evaluation of qualifications is the first step the Owner will take in a three-step process for selecting a Construction Manager at Risk firm for the Project as provided by Texas Education Code §51.782(e). This RFQ/P solicitation package provides the information necessary to prepare and submit Qualifications for consideration and initial ranking by the Owner. During this first step in the selection process, Owner will evaluate and rank Respondents according to fixed evaluation criteria, considering only their qualifications and independent of any cost and compensation considerations.

1.1.2 In the second step of the process, Owner will open and evaluate the Pricing and Delivery Proposals submitted in accordance with Section 4 of this RFQ/P. The results of the Qualifications and the Proposals evaluations will then be combined to determine the “best value” proposition for the Owner.

1.1.3 In the third step of the process, the “most” qualified Respondents may be requested to attend an interview with the Owner to confirm their Proposal and answer additional questions. This step usually only involves three to five of the highest ranked Respondents. Based on interview results, the Owner may readjust its evaluations of those interviewed. Owner reserves the right to conclude the evaluations and make a best value selection without conducting interviews.

1.2 PUBLIC INFORMATION: All information, documentation, and other materials submitted in response to this solicitation are considered non-confidential and/or non-proprietary and are subject to public disclosure under the Texas Public Information Act (Texas Government Code, Chapter 552.001, et seq.) after the solicitation is completed. The Owner strictly complies with all statutes, court decisions, and opinions of the Texas Attorney General with respect to disclosure of RFQ information. Additionally, if required pursuant to the provisions of Senate Bill 20 (79th Legislature 2015), the contract resulting from this solicitation will be posted on the Owner’s website.
1.3 **TYPE OF CONTRACT:** Any contract resulting from this solicitation will be in the form of the Owner’s Standard Construction Management-at-Risk Contract (CMAR), a copy of which is posted on Owner’s website at [http://www.tsus.edu/about/policies.html](http://www.tsus.edu/about/policies.html).

1.3.1 The CMAR should be viewed as a draft and is subject to change. The Uniform General Conditions may be viewed on the TSUS website at: [http://www.tsus.edu/about/policies.html](http://www.tsus.edu/about/policies.html)

1.4 **CLARIFICATIONS AND INTERPRETATIONS:** Any clarifications or interpretations of this RFQ/P that materially affect or change its requirements will be issued formally by the Owner as a written addendum. It is the responsibility of all Respondents to check the status of formal addenda five days before the submission deadline and to obtain this information in a timely manner. All such addenda issued by the Owner before the submittals are due shall be acknowledged by Respondents in its response to the RFQ/P.

1.4.1 Respondents shall be required to consider only those clarifications and interpretations that the Owner issues by addenda five (5) or more days prior to the submittal deadline. Interpretations or clarifications obtained in any other form, including oral statements, will not be binding on the Owner and should not be relied on in preparing Qualifications. The deadline for the receipt of written questions is stated in Section 2.5.

1.4.2 **ADDENDA, IF REQUIRED, WILL BE ISSUED BY THE TEXAS STATE UNIVERSITY SYSTEM FOR THIS RFQ/P VIA THE ELECTRONIC BUSINESS DAILY WEBSITE AT:** [HTTP://ESBD.CPA.STATE.TX.US](http://esbd.cpa.state.tx.us). **REFERENCE THE RFP NUMBER PROVIDED IN THIS RFQ/P.**

1.5.1 The qualifications and proposals must be received at the address specified in Section 1.5.2 prior to the deadline; please note that overnight deliveries such as FedEx and UPS arrive at a central campus location but are not usually delivered to the specified location until after the time deadline, and respondents are advised to use other methods of delivery or, if using an overnight delivery service, to send the responses a day earlier than usual. The Owner will not consider any response to this solicitation that is not received at the address specified by the deadline, regardless of whether it has been received by the University.

1.7 EVALUATION OF QUALIFICATIONS AND PROPOSALS: The evaluation of the Qualifications and Proposals shall be based on the requirements described in this RFQ/P. All properly submitted Qualifications and Proposals will be reviewed, evaluated, and ranked by the Owner. The top five or fewer ranked Respondents may be selected by the Owner to participate in an interview process.

1.7.1 Statement of Qualifications packages shall not include any information regarding Respondent’s fees, pricing, or other compensation. Such information should be kept separate from the qualifications and should be submitted as a separate package according to this RFQ/P.

1.8 OWNER’S RESERVATION OF RIGHTS: The Owner may evaluate the Qualifications based on the anticipated completion of all or any portion of the Project. The Owner reserves the right to divide the Project into multiple parts, to reject any and all responses to the current solicitation and reissue a completely new solicitation involving the same project, or to simply reject any and all responses and temporarily or permanently abandon the Project. Owner makes no representations, written or oral, that it will enter into any form of agreement for any project with any Respondent to this RFQ/P and no such representation is intended or should be construed by the issuance of this RFQ/P.

1.9 ACCEPTANCE OF EVALUATION METHODOLOGY: By submitting its Qualifications in response to this RFQ/P, Respondent accepts the evaluation process and acknowledges and accepts that determination of the “most qualified” firm(s) will require subjective judgments by the Owner. The results of this most qualified determination will be combined with the Proposal evaluation results to determine the best value proposition for the Owner. Determinations by the evaluation committee will be subjected to routine administrative review by the TSUS executive officers but, once a selection is announced, it will not be subjected to further review.

1.10 NO REIMBURSEMENT FOR COSTS: Respondent acknowledges and accepts that any costs incurred from the Respondent’s participation in this RFQ/P process shall be at the sole risk and responsibility of the Respondent. Respondents submit Qualifications and Proposals at their own risk and expense.

1.12 **ELIGIBLE RESPONDENTS:** Only individual firms or lawfully formed business organizations may apply. (This does not preclude a Respondent from using consultants.) The Owner will contract only with the individual firm or formal organization that submits a Qualification.

1.13 **HISTORICALLY UNDERUTILIZED BUSINESSES SUBMITTAL REQUIREMENTS:** It is the policy of the Texas State University System and each of its component institutions, to promote and encourage contracting and subcontracting opportunities for Historically Underutilized Businesses (HUB) in all contracts. Accordingly, the TSUS has adopted the Policy on Utilization of Historically Underutilized Businesses (See 1.13.2). The Policy applies to all contracts with an expected value of $100,000 or more. If TSUS determines that subcontracting opportunities are probable, then a HUB Commitment Letter is a required element of the Qualifications. Failure to submit a required HUB Commitment Letter will result in rejection of the Qualifications.

1.13.1 **STATEMENT OF PROBABILITY:** The Texas State University System has determined that subcontracting opportunities are probable in connection with this procurement solicitation. Therefore, a HUB Commitment Letter (HCL) is required as a part of the Respondent's Qualifications. The Respondent shall develop and administer a HCL as a part of the Respondent's Qualifications in accordance with the Policy on Utilization of Historically Underutilized Businesses (HUB).

1.13.2 Refer to the Texas State Comptrollers website for the Policy on Utilization, Historically Underutilized Business to download the latest forms and instructions: [http://www.cpa.state.tx.us/procurement/prog/hub/hub-subcontracting-plan/](http://www.cpa.state.tx.us/procurement/prog/hub/hub-subcontracting-plan/)

1.13.3 The “Statement of Probability” determines the probability for subcontracting opportunities.

1.13.4 Submit originals and copies of the HUB Commitment Letter in a separate attachment apart from the submittal of qualifications and apart from the proposal and qualifications packages as stated in Article 1.5.5 of this RFQ/P.

1.14 **CERTAIN PROPOSALS AND CONTRACTS PROHIBITED:** Under Section 2155.004, Texas Government Code, a state agency may not accept a proposal or award a contract that includes proposed financial participation by a person who received compensation from the agency to participate in preparing the specifications or request for proposals on which the proposal or contract is based. All vendors must certify their eligibility by acknowledging the following statement, "Under Section 2155.004, Government Code, the vendor certifies that the individual or business entity named in this bid or contract is not ineligible to receive the specified contract and acknowledges that this contract may be terminated and payment withheld if this certification is inaccurate." If a state agency determines that an individual or business entity holding a state contract was ineligible to have the contract accepted or awarded as described above, the state agency may immediately terminate the contract without further obligation to the vendor. This section does not create a cause of action to contest a proposal or award of a state contract.

1.15 **SALES AND USE TAXES:** Section 151.311, Tax Code, as amended effective October 1, 1993, permits the purchase free of state sales and use taxes of tangible personal property to be incorporated into realty in the performance of a contract for an improvement to realty for certain
exempt entities that include the Texas State University System. The section further permits the purchase tax-free of tangible personal property (other than machinery or equipment and its accessories and repair and replacement parts) for use in the performance of such a contract if the property is "necessary and essential for the performance of the contract" and "completely consumed at the job site." In addition, the section permits the purchase tax-free of a tangible service for use in the performance of such a contract if the service is performed at the job site and if "the contract expressly requires the specific service to be provided or purchased by the person performing the contract" or "the service is integral to the performance of the contract."

1.16 CERTIFICATION OF FRANCHISE TAX STATUS: Respondents are advised that the successful Respondent will be required to submit certification of franchise tax status as required by State Law (H.B. 175, Acts 70th Leg. R.S., 1987, Ch. 283, p. 3242). The contractor agrees that each subcontractor and supplier under contract will also provide a certification of franchise tax status.

1.17 REQUIRED NOTICES OF WORKERS' COMPENSATION INSURANCE COVERAGE: The Texas Workers' Compensation Commission has adopted a new rule, 28 TAC, sec. 110.110, relating to REPORTING REQUIREMENTS FOR BUILDING OR CONSTRUCTION PROJECTS FOR GOVERNMENTAL ENTITIES. The rule applies to all building or construction contracts advertised for bid on or after September 1, 1994. The rule implements sec. 406.096, Texas Labor Code, which requires workers' compensation insurance coverage for all persons providing services on a building or construction project for a governmental entity. The requirements of the rule are set forth in the Uniform General and Supplementary General Conditions for the Texas State University System Building Construction Contracts.

1.18 PREVAILING WAGE RATE DETERMINATION: Respondents are advised that the Texas Prevailing Wage Law will be administered. The penalty for violation of prevailing wage rates has been increased from $10.00 per underpaid worker per day or portion thereof to $60.00. The Prevailing Wage Rate for General Decision Number: General Decision Number: TX160306 01/08/2016; TX306 Superseded General Decision Number: TX20150306; State: Texas; Construction Type: Building; County: Jefferson County in Texas, can be found on the following website: http://www.wdol.gov/dba.aspx

1.19 DELINQUENCY IN PAYING CHILD SUPPORT: Under Section 231.006, Family Code, the vendor or applicant certifies that the individual or business entity named in this contract, bid, or application is not ineligible to receive the specified grant, loan, or payment and acknowledges that this contract may be terminated and payment may be withheld if this certification is inaccurate.

SECTION 2 – EXECUTIVE SUMMARY

2.1 HISTORICAL BACKGROUND: Lamar University was founded in 1923 a few blocks from the current location as South Park Junior College and enrolled 125 students in its first fall semester. The name changed to Lamar College in 1932 in honor of Mirabeau B. Lamar, second president of the Republic of Texas and the “Father of Education” in Texas. In the early 1940s, Lamar separated from the South Park school district, which had created the college, and moved to its current location.

In 1951, the school became Lamar College of Technology, a state-supported four-year institution, the first junior college in Texas to make such a transition. Lamar experienced tremendous growth during the 1950s and 1960s in both the number of students and the number of buildings on campus.
Lamar’s stature as a research institution continued to grow with the introduction in 1970 of its first doctoral program. In 1971, the name changed to Lamar University. During the 1970s, the university began operating branch campuses in Port Arthur and Orange, which later became separate institutions. During the 1980s, the university was part of the Lamar University System.

Lamar University joined The Texas State University System in 1995. Under the leadership of President Emeritus James M. Simmons, who served from 1999 to 2013, and current President Kenneth R. Evans, the university experienced another period of significant growth adding a host of facilities to improve campus life, attracting generous donations from alumni and friends and prestigious research grants to improve scholarship and teaching, while setting repeated enrollment records.

Home to 15,000 students, Lamar University is one of the fastest growing universities in Texas and is one of eight institutions of The Texas State University System. LU offers more than 100 programs of study leading to bachelors, masters and doctoral degrees. Approximately 1,200 faculty and staff members work for the university on its 270-acre campus in Beaumont 90 miles east of Houston and 25 miles west of Louisiana. LU has more than 85,000 alumni who live in every county in Texas, in each of the 50 states and nations around the world.

The university has been nationally recognized for the quality of its core curriculum and the diversity of its student body. Small class sizes and a 19:1 student-to-faculty ratio allow students to build meaningful relationships with expert faculty who truly care about their success. LU is designated as a Carnegie Doctoral Research University, one of only 29 public schools in the nation to receive this honor.

LU stresses academic achievement by emphasizing hands-on learning at all levels, providing ample opportunities for undergraduate research and supporting an excellent program through the Reaud Honors College. The university is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools and several LU colleges and programs hold additional specialized certifications recognizing their quality and expertise.

More than 2,200 students live on campus in modern, apartment-style residence halls known as Cardinal Village, which feature private bedrooms and furnished living areas. All Lamar University students have access to the Brooks-Shivers Dining Hall and the spacious Sheila Umphrey Recreational Sports Center.

The university also offers the Texas Academy of Leadership in the Humanities, which is a highly selective, early college entrance program for gifted and talented students eager for an enriched intellectual program enhanced by the disciplines of the humanities. The academy is one of only two residential programs for gifted and talented high school-aged students recognized by the Texas State Legislature. TALH students reside in Lamar University’s Cardinal Village and take the courses from LU faculty.

Beyond the classroom, Lamar University students develop leadership skills and lifelong friendships in more than 200 campus clubs and organizations. Students make an impact through nationally affiliated fraternities and sororities, professional associations, cultural groups, religious clubs and service organizations.

2.2 MISSION STATEMENT: Lamar University engages and empowers students with the skills and knowledge to thrive in their personal lives and chosen fields of endeavor. As a doctoral granting institution, Lamar University is internationally recognized for its high quality academics,
innovative curriculum, diverse student population, accessibility, and leading edge scholarly activities dedicated to transforming the communities of Southeast Texas and beyond.

2.3 PROJECT DESCRIPTION, SCOPE AND BUDGET: The new Science and Technology building will be constructed on a site located on the southern portion of campus. The new building is sited to take advantage of a future pedestrian corridor planned for Cunningham Street and new campus entry off Rolfe Christopher Drive. The site is a prominent location and will be a highly visible as Lamar University continues to grow. As a platform for research creativity, this new facility will embody a new paradigm for interaction, instruction, and research at the University. Allotting over three-fourths of assignable square footage to instructional laboratories for upper-level biology, interdisciplinary flex research laboratories, and an innovation space, the new facility will allow the University to better serve students and faculty across all science disciplines and form strategic partnerships for various research initiatives. Upper level biology instruction will focus on experimental methods, systematics and technology, cell/molecular biology, organisms, and botany. An exterior, prefabricated greenhouse is included in the project for additional instructional purposes. Flexible research labs will serve organic/wet chemistry, cell/molecular biology, biochemistry, computation, and engineering. The innovation space will provide necessary capabilities to build and prototype special design and interdisciplinary research projects focused on energy, sustainability, medical devices, and global health at the undergraduate and graduate level. The new Science and Technology building will also include a multipurpose space, faculty offices, a senior leadership suite, and required building support spaces. These spaces will support the University’s growing demand for science instruction and research, reflect a high level of quality instruction, and ensure faculty presence within the new facility. As currently programmed, the building totals approximately 78,400 gross square feet (gsf), which translates to approximately 46,500 assignable square feet (asf) at a 60% efficiency factor.

Accessible parking, a service drive to the exterior yard and loading dock area, a limited number of service vehicle parking spaces and a drive for pick up and drop off are envisioned to be located on the immediate building site. Outside of the scope of this project, a new parking lot will be constructed to replace the 250 spaces that will be displaced by the new building.

An upgrade and/or expansion to the South Central Plant is anticipated to provide chilled water and electrical service to the new building site and is part of the project scope. A tunnel extension will be required from the Speech and Hearing building to the new building site to distribute these utilities. Domestic water, natural gas, sanitary sewer and fiber runs will likely be tied into existing utilities along Rolfe Christopher Drive. A study of existing campus utilities is currently underway to assess current and future capacities and will be shared with the project team when it is available. Many goals and priorities guided the building committee during the programming phase for the new Science and Technology building. Some of the key principles are as follows: showcase Lamar’s commitment to education and research; create a collaborative and innovative place to be; replace substandard upper level biology instructional labs; create interdisciplinary instructional and research lab space; provide unique capabilities and flex space to facilitate innovative research; serve as a recruitment tool for faculty, students, professionals, research, industry, funding opportunities, and potential donors; showcase research on display; incorporate sustainable design principles; be flexible, modular, reconfigurable, adaptable; feel: light, bright, and modern, but also timeless in its design.

The total Construction Cost Limitation for this project is $46,300,000.

2.4 FACILITY PROGRAM: The Facility Program for this Project is in progress and will be completed prior to the announcement of the short-listed firms. This document will be shared with those firms
selected to participate in the interview stage of the selection process, or in the absence of interviews, to the selected, most qualified respondent prior to any detailed discussions of design services scope or related fee.

Solicitation Number ________________

Dear Ms. Miller:

In accordance with the requirements outlined in the specification section 1.13 “HISTORICALLY UNDERUTILIZED BUSINESSES SUBMITTAL REQUIREMENTS” I am pleased to forward this HUB Subcontracting letter as an integral part of our proposal in connection with your invitation for request for this proposal.

I have read and understand the State of Texas’ policy on Utilization of Historically Underutilized Businesses (HUBs).

If awarded this contract we understand that we will be required to attend a meeting with the University's HUB coordinator to discuss HSP requirements in soliciting for subsequent subcontractors for this project. Good Faith Effort will be documented and will contain a completed HUB Subcontracting Plan for each subcontracting opportunity.

Documentation of subcontracted work will be provided with each pay request on the Monthly Progress Assessment Report.

Sincerely,

Contractor’s Name

NOTE:

With your RFQ submit, a Letter of HUB Commitment, see sample letter above, and include how your firm will participate and demonstrate a good faith effort in achieving the University's HUB goals. Provide recent examples where your firm has met or exceeded HUB goals on previous projects.
