

Join us for a marketing-focused experience in a successful start-up!

Our internship involves an extremely varied and diverse set of tasks associated with recruiting and attracting both agents and clients to the brokerage and managing their expectations once they decide to do business with Vibrant.

In 18 months we have grown to about 30 agents and some of our top producers have closed million dollar deals and have closed as many as 9 deals in a single month. We have gone head to head with some of the top brokerages in town and won due to our unique value proposition in the marketplace.

We manage cutting edge systems to reach and recruit agents across the DFW Metroplex and then we provide them with the best tools to market themselves and sell residential, commercial, and investment real estate.

Responsibilities:

- Assist owners with various day-to-day recruiting and prospecting activities
- Use our systems to create prospectuses for potential clients and agents
- Work with owners to update productivity reports, conduct market research, develop marketing strategies, and support specific property transactions
- Analyze investment deals to determine the best way to market them
- Research owner and agent data for specific submarkets Vibrant targets
- Participate in weekly and monthly training meetings with our agents
- Use Vibrant systems to provide backend support tracking our production
