

Jobs in the Micro- and Nano- Electronics Industry—

Connecting College Students to Industry!

Learn about career paths and opportunities in high tech.
Acquire valuable, practical information that will help
you choose a career direction and plan for success.

This seminar will help students to meet the demands of today's
high tech work force and be successful with their careers.
Industry volunteers will share what the high tech industry looks
for when they recruit for new graduates.

**Students in Engineering, Computer Science, Materials
Science, Chemistry, Physics, Business are strongly
encouraged to attend!**
