Topology Seminar at Texas State

**When:** Tuesday, 2019, October 15, 12:30-1:50 p.m.  **Where:** ENC 230

**Speaker:** Dr. Hiro Lee Tanaka

**Topic:** Fukaya Categories of Disks, Lagrangian Cobordisms, K-theory

**ABSTRACT**
We'll now see more examples of Fukaya categories—the simplest ones are the Fukaya categories of disks. We'll see that Lagrangian cobordisms give rise to K-theory classes of Fukaya categories.
