

September 15th

Take Back the Tap: Texas State

Reusable bottle distribution: Wednesday · 10 am · Quad

Screening of Tapped: Wednesday · 7:30 pm · LBJ Teaching Theater

Did you know that 40% of bottled water is just filtered tap water and that 2.4 million tons of plastic ends up in a landfill each year from the U.S.'s consumption of bottled water alone? There are many problems associated with our consumption of bottled water including negative health impacts, local issues, environmental impacts, and cost. To become better informed of these problems, and to be part of the solution, students at Texas State have gathered together to host a Take Back the Tap day on campus. We will be giving out 1,000 reusable water bottles in the quad, and screening a film called Tapped in the evening. For more information check out our facebook group at <http://www.facebook.com/#!/group.php?gid=114872985202925&ref=ts> or email questions to tbtt.txstate@gmail.com. Sponsored by Texas State's Environmental Service Committee, Food and Water Watch, and Supporting Women In Geography (SWIG).
