Statistics Seminar

Learning about meta-analyses and meta-analyses about learning!
Carlton J. Fong

Friday, February 14 12:00 DERR 122

Abstract: Learning about meta-analyses and meta-analyses about learning! Dr. Fong will discuss the processes and problems associated with meta-analysis as well as present findings from recent meta-analyses on factors associated with student learning.

Dr. Carlton J. Fong is an assistant professor in Developmental Education in the Department of Curriculum and Instruction. Dr. Fong uses meta-analytic techniques to examine the role of psychological factors in student learning in postsecondary contexts.
