

Summer 2018 Store Operations Management Internship Program

We are excited to announce that McCoy's will have another internship opportunity available to Texas State students this summer, called the Summer 2018 Store Operations Management Internship Program.

This Program is designed for Business Management students, ideally those who are classified as juniors or seniors, who have an interest in exploring an Operations Management career with McCoy's Building Supply. The program requires 10 weeks of fulltime work to include a 3-day HQ Orientation and a 1-day meeting with a presentation to McCoy Executives for a total of approximately 400 hours. Work is to be completed between early May and mid-August 2018. The internship is paid at an hourly wage of \$12.00 to 12.50 per hour. The work schedule, including reporting time, end of shift, days that are scheduled, and scheduled off days, are subject to the scheduled produced by management of the assigned store location, but can be flexibly arranged for the student. Approved Texas locations for this internship program include Brazoria, Bastrop, New Braunfels, Victoria, Pharr, Bryan, Tyler, Georgetown, Austin 290 West, San Marcos, Austin Bee Cave, and Montgomery.

While in the Program, candidates will have an opportunity to work alongside experienced McCoy's team members and learn many of the critical functions required to operate a McCoy's Building Supply retail facility. In addition, they will complete a project to identify both market strengths and opportunities for the McCoy's location to which they are assigned.
