

About
80 percent
of all ground-
water used in Texas
is for irrigating crops.¹

The average American uses 176 gallons of water per day compared to 5 gallons of water the average African family uses each day.²

Water scarcity already affects more than 40 percent of the people on the planet.³

Globally, 1/3 of all schools lack access to safe water and adequate sanitation.⁴

At any one time, it is estimated that half the world's hospital beds are occupied with patients suffering from waterborne diseases.⁵

The water crisis is the #1 global risk based on impact to society as a measure of devastation.⁶
