Statistics Seminar

In-class stats software: comparison of different stats packages

Friday, April 12, 2019
12:00 – 1:00
Derr 339

Abstract
When teaching introductory level statistics, one of the hardest decisions is the choice of software. In this talk we will present criteria to consider when making this choice, as well as pros and cons of some common choices in software (e.g. Excel, SPSS, Statcrunch and R). I will present my experience with the software and lead a discussion on recent experiences with other software choices available.

Alex White has a Ph.D. in Statistics from Michigan State University, and is a Professor at the Department of Mathematics, Texas State University.
