For your safety, you must receive your first allergy injection(s) at your allergist’s office. When initiating or restarting immunotherapy, return to your allergist for care. The Student Health Center (SHC) will not initiate injections, but they will give subsequent injections for a fee. *Beginning January 1, 2014 all patients will be required to have an epi pen with them at the time of injections.

To begin receiving allergy injections at the SHC, you will need to provide the following information:

- Proof that your allergist is licensed to practice in Texas.
- Allergy serum should be labeled with the patient’s name, serum, strength, and expiration date.
- Documentation of the last injection(s) is required and must include the vial name, the date, dose, reaction, and nurse’s signature.
- Specific, clear orders from the allergist that includes the dose schedule, instructions for late injections and reactions signed by physicians. Failure to provide clear orders may result in our refusal to administer injections.

Have the above documentation mailed, faxed, or brought by the SHC.

A nurse will contact you when the necessary documentation has been received and help you schedule an appointment with a SHC physician. The physician will give the final approval for receiving injections at the SHC.

Once this initial process has been completed, you will simply call the SHC to schedule subsequent appointments through the Nurse’s Clinic. Injections are given by appointment only. Please call one week in advance.

For immunotherapy to be effective, it is essential that you receive your injections according to your allergist’s schedule. Failure to be compliant may result in loss of privileges of receiving injections at the SHC.

Please call the SHC at (512) 245-2161 for fee information.
